LYXOR UCITS ETF EASTERN EUROPE (CECE NTR EUR) - USD (the "Fund")

ISIN: FR0010654095 - Collective investment scheme (FCP) domiciled in France.

Managed by Lyxor International Asset Management ("LIAM")

Objectives and investment policy

The investment objective is to track both the upward and downward evolution of the CECE EUR Net Total Return Index (Bloomberg code: CECENTRE) representative of the Hungarian, Czech and Polish equity markets ("Benchmark Index").

The anticipated ex-post tracking error under normal market conditions is 0.15%.

The Fund aims to achieve its objective through indirect replication, namely by entering into one or more over-the counter swap agreements (financial futures).

The Fund may invest in a diversified portfolio of international equities, the performance of which will be swapped against that of the Benchmark Index via financial futures. An up-to-date breakdown of the Fund's securities portfolio is provided on the website www.lyxoretf.com.

The indicative net asset value is also shown on the Fund's Reuters and Bloomberg pages, and may also be referenced on the websites for markets where the Fund is listed.

The unit currency is the US Dollar.

Risk and return profile

The risk and return category provided below is based on the historical performance of the assets included in the fund or of its benchmark index. This risk indicator may, therefore, not be a reliable indicator of future risk, and it may change over time. The lowest category does not mean that the investment is risk-free. Resulting from its exposure to the Benchmark Index, the Fund has been classified within category 6. Category 6 indicates that it is possible to suffer a severe loss of capital under normal market conditions; the value of your investment may change substantially and experience quite large daily upside or downside variations.

Material risks for the Fund not covered by the above indicator, which could lead to a decrease in the net asset value of the Fund, and which the Fund is authorised to disclose in this document (for more details about risks, please refer to the Risk Profile section of the prospectus):

- **Counterparty risk:** the Fund is exposed to the risk of bankruptcy, or any other type of default of any counterparty with which it has entered into an agreement or transaction. According to the UCITS regulations, this risk cannot exceed 10% of the total of the Fund's assets, for a given counterparty.
- **Risk of using financial futures:** in order to reach its investment objective, the Fund uses over-the-counter financial futures, which allow it to replicate the performance of the Benchmark Index. These financial futures could be affected by various risks such as changes in law and/or regulations, including tax regulations.
- **Fund Liquidity Risk:** The Fund's liquidity and/or value may be affected if, when rebalancing its exposure it is unable to execute trades in line with the index.
