Objectives and investment policy

The Fund is an active UCITS.

The investment objective of the Fund is to generate a return linked to money market rates.

The SONIA (Sterling Over Night Index Average) rate is an effective overnight interest rate computed as a weighted average of all overnight unsecured lending transactions in the interbank market in Pounds. Sonia reference rates are calculated by the Bank of England, based on all overnight interbank assets created before the close of RTGS systems at 6pm CET, and published through Thomson Reuters every day before 7pm CET.

The daily compounded SONIA integrates the impact of the reinvestment of the interests perceived under the OIS (Overnight Indexed Swap) methodology.
