Quarterly fund commentary

Asia Pacific ex Japan equity markets continued to rally in Q3 thanks to solid corporate earnings and favourable macroeconomic conditions. China was the region's best-performing market as confidence in the outlook for corporate earnings lifted market sentiment, while economic data remained robust, with positive manufacturing surveys and solid industrial profits. Hong Kong's equity market also benefitted from positive sentiment towards Chinese equities, while India's equity market made gains thanks to the favourable outlook for the economy and corporate earnings. ASEAN equity market returns were mixed. The Thai market rallied strongly on hopes of a recovery in exports and tourism, while Indonesia's market produced flat returns for the quarter. Australia's equity market rose, with the materials sector benefiting from stronger commodity prices. In terms of sector performance, the IT sector led on solid earnings growth, while higher commodity prices were positive for the energy and materials sectors. Our investment strategy remained focused on selecting companies with what we consider to be sustainable earnings growth in sectors such as IT, industrials, telecoms and utilities.
