Quarterly fund commentary

Emerging equity markets registered positive gains in the fourth quarter with the EMEA (Europe, Middle East and Africa) region ending the year on strong footing. Aided by rising commodity prices, Latin American equity markets finished the year on a winning note. Supported by earnings growth, the rally in Asia also continued. Brent crude oil prices strengthened to reach their highest level since 2015. The fund concentrates on stocks with attractive risk-return profiles as identified by a systematic investment process which is based on four concepts: Earnings Expectations, Market Sentiment, Management & Quality and Value. This approach can lead to active positions relative to the benchmark; currency exposures are strategically hedged. Looking at the performance attribution for the fourth quarter, the portfolio performed was marginally behind benchmark performance. Stock specific effects as well as the value factor were negative contributors. Coming into 2018, the fund's largest allocations are in Korea, India, and South Africa as well as, from a sector perspective, in industrials, materials, and financials.
