Quarterly fund commentary

The fourth quarter saw further spells of financial market volatility led by continued trade tensions between the US and China, fears of recession, and Brexit concerns. The increased levels of volatility in the market raised demand for the perceived safety of core government bond markets. The European Central Bank (ECB) reiterated its positive outlook for the Eurozone. However, Mario Draghi, president of the ECB stated that slower growth lies ahead for the eurozone, reflecting persistently weak data for the region in recent months. The ECB also announced the end of its €2.3tn quantitative easing (QE) programme, and that the ECB's policy interest rates would remain at their current levels until at least the summer of 2019. Against this macro-economic backdrop, European government bonds outperformed European corporate bonds during the period. In corporate bonds, European investment grade bonds outperformed European high yield. Performance was negative across all European corporate bonds sectors. The fund is primarily invested in a diversified portfolio of euro sovereign and investment grade corporate bonds. Within peripheral euro sovereign bonds (non-core) we remained in line with the reference benchmark over the quarter. In our corporate bond allocation, we continued to prefer BBB rated bonds and financials with a focus on bonds issued by countries from well capitalised non-peripheral European countries. Currency opportunities remain limited in our opinion.
