Quarterly fund commentary

The last three months have been difficult for the Pan European equity markets as investor sentiment continues to worsen. Trade tensions, lower than expected economic data, falling oil prices, widening credit spreads, and an array of unfinished political business have contributed to a rising sense of fear in the financial markets and increasingly volatile trading sessions. Against this backdrop, Communication Services was a standout performer followed by Information Technology. While Materials and Financials were the largest detractors. It is easy to be influenced by all the gloomy headlines. What matters to us however, as fundamental, valuation-based investors, is to assess if the outlook is as negative as what is being priced in. Even if things are only 'less bad', there could be significant opportunities to be had. The fund's strategy rests primarily on fundamental analysis and valuation, combined with a scrutiny of the macroeconomic context, to identify what we believe to be the best investment opportunities in Pan Europe.
