Quarterly fund commentary

The last three months have been difficult for the Pan European equity markets as investor sentiment continues to worsen. Trade tensions, lower than expected economic data, falling oil prices, widening credit spreads, and an array of unfinished political business have contributed to a rising sense of fear in the financial markets and increasingly volatile trading sessions. Within the fund, Information Technology was a standout performer followed by Communication Services. While Materials and Financials were the largest detractors. It is easy to be influenced by all the gloomy headlines. What matters to us is to assess if the outlook is as negative as what is being priced in. When markets are as polarised as they currently are, we must build portfolios which express a firm view based on fundamental analysis. Our approach has long been based on valuation: we look for mispriced stocks in all sectors of the equity market and we find that the disparities between stocks, sector and styles are particularly wide at present. The fund has a focused portfolio of stocks, of what we view as high conviction ideas across the Pan European equity universe.
