Quarterly fund commentary

Pan-European small and mid-capitalisation equity markets advanced in Q4. Europe ended the year on strong footing as economic activity continued to expand at healthy levels in both the manufacturing and services sectors. The eurozone unemployment rate continued its decline in Q4, to the lowest in almost nine years, further underpinning domestic demand. Against such a backdrop, the European Central Bank (ECB) announced its first steps towards reducing stimulus measures after years of very accommodative policies, cutting monthly asset purchases by half starting from January 2018. However, with pricing pressures remaining subdued, the ECB extended its quantitative easing programme by another nine months to allow inflation to build up further. In our view, continued growth in domestic demand and falling unemployment in the Eurozone suggest mounting core inflationary pressures as we move through 2018. On the UK side, Q4 witnessed the Bank of England's first interest rate rise in a decade, in an attempt to constrain inflation from going further above the target level. The fund's strategy is to invest in pan-European smaller companies with what we consider to be healthy financial positions, sound management and a potential to deliver higher returns on capital. Valuation is key in the investment process.
