Quarterly fund commentary

The last three months have been difficult for the European markets as investor sentiment continues to worsen. Trade tensions, lower than expected economic data, falling oil prices, widening credit spreads, and an array of unfinished political business have contributed to a rising sense of fear in the financial markets and increasingly volatile trading sessions. Within the fund, Industrials was a standout performer followed by Materials. While Energy and Health Care were the largest detractors. It is easy to be influenced by all the gloomy headlines. What matters to us is to assess if the outlook is as negative as what is being priced in. When markets are as polarised as they currently are, we must build portfolios which express a firm view based on fundamental analysis. The fund's strategy is to invest in Pan European smaller companies with what we consider to be healthy financial positions, sound management and a potential to deliver higher returns on capital. Valuation is key in the investment process.
