### Quarterly fund commentary

Asian equity markets rallied thanks to positive earnings growth and solid global economic expansion. In China, 3Q results led to higher earnings expectations in the internet and industrial sectors. Elsewhere, Indian equities were supported by the Bharatiya Janata Party's victories in state elections and the planned recapitalisation of the state-owned banks. In Korea, the market was robust on the back of an agreement with China, which normalised relations post the installation of the US anti-missile system, and strong 3Q GDP growth. Taiwan ended the quarter higher but parts of the market exposed to Apple's supply chain suffered due to lukewarm demand for iPhone X and iPhone 8. In Japan, the equity market gained on robust quarterly results, a positive global economic backdrop and the victory of the ruling coalition in the snap election. We seek to invest in companies whose share prices are substantially below our estimate of fair value. The fund has a high weighting in Chinese internet companies, while a notable exposure in South Korea reflects our belief that companies are likely to adopt shareholder-friendly policies. New positions included: an electronic equipment manufacturer as we believe its long-term growth drivers will support attractive top line revenue growth with some margin improvement; and a Chinese fertiliser and chemical manufacturer as we believe its outlook is attractive given the supply side restructuring in the Chinese fertilizer industry. In Japan, the fund is slightly overweight its benchmark MSCI AC Pacific Index, and there has been a shift towards cyclical sectors.
