Quarterly fund commentary

Emerging market (EM) bonds returned 1.16% for the quarter, as measured by the J.P. Morgan EMBI Global Diversified Index. EM spreads tightened 2bps to end the quarter at 284 bps. Returns were positive across regions led by Latin America and Europe. At the country level Ecuador, Angola, and El Salvador were the top performers while Venezuela, Belize and Tajikistan lagged. Emerging Markets posted another quarter of positive total returns amid low volatility in developed markets rates, and stable to improving prices across a variety of commodities. Adding to those supportive elements were continued flows into Emerging Markets and lighter new issuance at the end of the year. While the current backdrop of stable global growth, low inflation, and accommodative financial conditions are supportive of EM asset prices, there has been an increase in idiosyncratic stories; especially from the Middle East. Recent moves higher in commodity prices are also supportive of EM markets. While the macro backdrop remains supportive for EM, we are monitoring geopolitical events in the Middle East, NAFTA negotiations, and upcoming elections in Latin America closely. We continue to see supportive global financial conditions in spite of the Fed beginning to unwind its balance sheet.
