OBJECTIVES AND INVESTMENT POLICY

The objective of the Fund is to increase the value of your investment over the long term, by providing above-average returns with below-average volatility (changes in the value of your investment).

Portfolio securities

Under normal conditions, the Fund mainly invests in shares of companies that are based in, operate in, or do significant business in Asia (excluding Japan). The Fund may invests up to 50% of assets in China A Shares, either through Shanghai-Hong Kong Stock Connect or through other means. The Fund may also invests in bank deposits and money market instruments.

The Fund may use derivatives to reduce its exposure to various investment risks (hedging) and for efficient portfolio management, but not to directly seek investment gains.

RISK AND REWARD PROFILE

Risk and Reward Profile: The SRRRI (Synthetic Risk and Reward Indicator) demonstrates where the Fund ranks in terms of its potential risk and return. The higher the Fund's position on this scale, the greater possible reward, but also the greater risk of losing money.

The SRRRI rating above is based on medium-term volatility (actual or estimated variations in the Fund's share price over five years). Going forward, the Fund's actual volatility could be lower or higher, and its rated risk/reward level may be changed.

The Fund's risk level reflects the following:

- As a class, shares carry higher risks than bonds or money market investments.
- The Fund focuses on a single geographical region that tends to have above-average risks.

We bring your attention to the fact that:

- Historical data used in calculating the SRRRI may not be a reliable indication of the future risk profile of the Fund.
- The risk indicator shown above is not guaranteed and it may shift over time. The lowest category does not mean a risk free investment.

Emerging markets risk: emerging markets are more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

China A-Shares risk: The Fund may be investing in China A-Shares via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect which may entail additional clearing and settlement, regulatory, operational and counterparty risks.

Management risk: Portfolio management techniques that have worked well in normal market conditions could prove ineffective or detrimental during unusual conditions.
