

LA FRANÇAISE

La Française LUX - Protectaux - Class I Capitalisation EUR-LU0970533914

A share class of La Française LUX - Protectaux (the “Fund”),
a sub-fund of the UCITS La Française LUX (The “UCITS”)
The Fund is managed by La Française AM International,
part of La Française group of companies

Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVES AND INVESTMENT POLICY

The objective of the Fund is to achieve a positive performance over a 2-year period, in an environment of rising 10-year interest rates within the Eurozone.

Specifically, the Fund seeks to correlate its return with long-term interest rates.

Reference benchmark (for context purposes only) Lyxor Bund Daily (-1x) Inverse UCITS ETF – Acc. (code bloomberg : BUNS FP)

The Fund invests mainly in top-rated government bonds that are denominated in EUR and are issued either in France or in other OECD countries.

Specifically, the Fund invests in fixed debt securities and negotiable debt instruments that are issued or guaranteed by the French state or an OECD member state. At the time of investment, these securities are rated AAA by Standard & Poor's or judged equivalent by the investment manager; however, if they subsequently decline in quality, the Fund may continue to hold them. However, the Fund will not allow more than 10% of net assets to be invested in securities that have declined to below investment grade levels.

The Fund may invest in, or be exposed to, the following investments up to the percentage of net assets indicated:

- corporate bonds: 20%

- other UCITS/UCIs: 10%

The Fund may hold cash and cash equivalents on an ancillary basis. These may include monetary UCIs or UCIs whose investments' overall weighted maturity or rate reset frequency does not exceed 12 months.

The Fund's modified duration may vary from -10 to 2.

The investment manager actively manages short positions on futures and forward contracts to take advantage of potential interest rate rises

The Fund may use derivatives as a substitute for direct investment, for hedging and for efficient portfolio management.

The Fund may also use repurchase and reverse repurchase agreements for efficient portfolio management and to create arbitrage positions designed to profit from changes in interest rate spreads.

You can buy and sell shares of the Fund daily.

All income generated by share Class I Capitalisation EUR of the Fund is reinvested and included in the value of its shares.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 2 years.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Typically lower rewards → Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Risk and Reward Profile: The SRRI (Synthetic Risk and Reward Indicator) demonstrates where the Fund ranks in terms of its potential risk and return. The higher the Fund's position on this scale, the greater possible reward, but also the greater risk of losing money.

The risk category is 4, which reflects the risk of investing in debt instruments, mainly in the public sector.

We bring your attention to the fact that:

- Historical data used in calculating the SRRI may not be a reliable indication of the future risk profile of the Fund.
- The risk indicator shown above is not guaranteed and it may shift over time. The lowest category does not mean a risk free investment.

Risks materially relevant to the Fund which are not adequately captured in the indicator:

Credit risk: the Fund can invest in debt securities. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer.

Counterparty risk: the Fund enters into contracts with various counterparties. If a counterparty does not fulfil its obligations to the Fund (e.g. not paying an agreed amount or not delivering securities as agreed) the Fund can suffer a loss.

Interest rate risk: an increase in interest rates may cause the value of fixed income securities held by the Fund to decline. Bonds prices and yield have an inverse relationship, when the price of a bond falls the yield rises.

Risk linked to the impact of management techniques: risk of increased losses owing to the use of financial futures instruments such as OTC financial agreements, and/or the temporary acquisition and transfer of securities, and/or futures contracts, and/or derivative instruments. This risk may lower the net asset value.

Selection risk: the Investment Manager's judgment about the attractiveness, value and potential appreciation of a particular company's security could be incorrect.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST	
Entry charge	3.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and/or before the proceeds of your investment are paid out. The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

CHARGES TAKEN FROM THE FUND OVER A YEAR	
Ongoing charges	0.59%

The ongoing charges figure shown here is an estimate of the charges. The UCITS' annual report for each financial year will include detail on the exact charges made.

CHARGES TAKEN FROM THE FUND UNDER CERTAIN SPECIFIC CONDITIONS	
Performance fee	None

For more information about charges, please refer to the UCITS' prospectus, which is available at the registered office of the UCITS.

PAST PERFORMANCE

Benchmark index up to 30/09/2018 : JPM German Bund Index

Benchmark index as of 12/09/2018 : Lyxor Bund Daily (-1x) Inverse UCITS ETF – Acc

The Fund came into existence during the year 2013.

The past performance of this share class has been calculated in EUR, taking into account all charges and costs except for entry charges.

Past performance is not a reliable indicator of future results.
