## OBJECTIVES AND INVESTMENT POLICY

The objective of the Fund is to provide investors with exposure to China's long term growth through investments in listed companies having their operations in China, listed predominantly but not necessarily in Hong Kong and China.

### Portfolio securities

Under normal conditions, the Fund mainly invests in shares of companies that are based in, operate in, or do significant business in Hong Kong or China. The Fund may invests up to 100% of assets in China A Shares, either through Shanghai-Hong Kong Stock Connect or through other means. The Fund invest in bank deposits and money market instruments.

The Fund may use derivatives to reduce its exposure to various investment risks (hedging) and for efficient portfolio management, but not to directly seek investment gains.

## RISK AND REWARD PROFILE

**Risk and Reward Profile:** The SRRRI (Synthetic Risk and Reward Indicator) demonstrates where the Fund ranks in terms of its potential risk and return. The higher the Fund's position on this scale, the greater possible reward, but also the greater risk of losing money.

The SRRRI rating above is based on medium-term volatility (actual or estimated variations in the Fund's share price over five years). Going forward, the Fund's actual volatility could be lower or higher, and its rated risk/reward level may be changed.

The Fund's risk level reflects the following:

- As a class, shares carry higher risks than bonds or money market investments.
- The Fund focuses on a single geographical region that tends to have above-average risks.

We bring your attention to the fact that:

- Historical data used in calculating the SRRRI may not be a reliable indication of the future risk profile of the Fund.
- The risk indicator shown above is not guaranteed and it may shift over time. The lowest category does not mean a risk free investment.
