

LA FRANÇAISE

#### Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## La Française LUX – Inflection Point Zero Carbon - Class I EUR - Capitalisation-LU1190462546

A share class of La Française LUX – Inflection Point Zero Carbon (the “Fund”),  
a sub-fund of the UCITS La Française LUX (The “UCITS”)  
The Fund is managed by La Française AM International,  
part of La Française group of companies

### OBJECTIVES AND INVESTMENT POLICY

The Fund has three primary objectives:

- To take advantage of the growth potential of the international equity market including emerging market countries
- To actively seek out and invest in companies delivering solutions to the climate change challenge

- To outperform the MSCI All Country World Index in the long term (5 years) the MSCI All Country World Index denominated in EUR (for the Euro share classes) or USD (for the US dollars share classes) (net dividends reinvested).

The objective is to outperform, in the long term (5 years), the MSCI All Country World Index denominated in EUR (for the Euro share classes) or USD (for the US dollars share classes) (net dividends reinvested).

The Fund will invest in international equities including emerging markets of all market capitalizations without geographical or sectoral predominance.

The Fund mainly invests in two different types of companies:

- “best-in-class “ large-cap companies which, while currently emitting significant levels of greenhouse gases, have superior “carbon – efficiency”; that is, they produce less carbon dioxide or equivalent per dollar of EBITDA. Typically, such companies are already on a trajectory to make significant reductions in their emissions; and
- “solution providers” –those companies whose primary business activity is producing goods and services explicitly designed to reduce greenhouse gas emissions. These companies will typically, but not necessarily, be smaller and more focused.

The Fund may invest in listed equities or equivalent securities and/or subscription and allocation rights conferred by these equities.

The manager can invest in ADR (American Depositary Receipts) or GDR (Global Depositary Receipts) in order to ensure liquidity.

The overall exposure of the portfolio to equities including derivatives may represent at least 90% and limited to 105% of the Fund's net assets.

Equities are selected using a bottom-up approach, according to a proprietary financial scoring model and an extra-financial approach, to include the use of

### RISK AND REWARD PROFILE

**Risk and Reward Profile:** The SRRI (Synthetic Risk and Reward Indicator) demonstrates where the Fund ranks in terms of its potential risk and return. The higher the Fund's position on this scale, the greater possible reward, but also the greater risk of losing money.

The risk category is 5 because investments in stocks, and particularly in emerging markets, tend to be subject to high price fluctuations

We bring your attention to the fact that:

- Historical data used in calculating the SRRI may not be a reliable indication of the future risk profile of the Fund.

- The risk indicator shown above is not guaranteed and it may shift over time. The lowest category does not mean a risk free investment.

ESG indicators. This method enables the manager to understand all aspects of the overall strategy of the listed companies. The criteria used in the scoring of assets cross-cut both market and activity sectors and, as such, allows for a more pertinent analysis of the relative positioning and dynamics of the selected companies, both strategically and in the long-term.

For the purposes of asset scoring, the manager relies on quantitative and qualitative research and on analysis stemming from a strategic partnership within the Group La Française.

The manager may substantially deviate from the benchmark, the MSCI All Country World Index.

The Fund may invest in securities denominated in currencies other than the euro. Up to 100% of the net assets of the Fund may be exposed to foreign exchange risk.

The Fund can also invest up to 10% of its net assets in shares or units of UCITS and/or other UCIs.

The Fund may hold ancillary liquid assets. The Fund may, with the aim of investing its liquid assets, invest :

- up to 10% of its net assets in fixed income products (negotiable debt securities) issued by public or private sector entities having a rating of at least BBB- by Standard & Poor's or at least Baa3 by Moody's in all geographical areas.
- in cash borrowings and the temporary purchase and sale of securities on an ancillary basis.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy and sell shares of the Fund daily.

All income generated by share Class I EUR - Capitalisation of the Fund is reinvested and included in the value of its shares.

**Risks materially relevant to the Fund which are not adequately captured in the indicator:**

**Derivative risk:** the Fund uses derivatives. These are financial instruments whose values depend on the value of the underlying asset. Small price fluctuations in the underlying asset can result in large price changes in the derivative.

**Exchange rate risk:** the Fund may invest in securities denominated in currencies other than the euro. Eurozone country investors are exposed to risks posed by fluctuations in currency exchange rates.

**Small Cap risk:** The Fund may be exposed to small caps. The trading volume on these stocks is lower and therefore upward and downward market movements may be more pronounced

**Model risk :** The Fund's investment process relies on the development of a proprietary financial and extra-financial scoring model, using indicators to include ESG indicators, through a strategic partnership within the Group La Française.

The model may not always perform as expected. The performance of the Fund may therefore be inferior to that of its investment objective and returns on investments may be negative.

## CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST	
Entry charge	3.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and/or before the proceeds of your investment are paid out. The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

CHARGES TAKEN FROM THE FUND OVER A YEAR	
Ongoing charges	1.31%

The ongoing charges figure is based on expenses for the year ending 23/07/2015. This figure may vary from year to year.

CHARGES TAKEN FROM THE FUND UNDER CERTAIN SPECIFIC CONDITIONS	
Performance fee	-

20% maximum of the difference between the Fund's performance and the MSCI All Country World Index denominated in the currency of the referred share class. The total amount of the outperformance fee is set at an upper limit of 2.5% of the average net asset of the Fund during the reference period. For more information about charges, please refer to the UCITS' prospectus, which is available at the registered office of the UCITS.
