

LA FRANÇAISE

La Française LUX – Multi-Asset Income - Class I - EUR - DISTRIBUTION- LU1190461902

**A share class of La Française LUX – Multi-Asset Income (the “Fund”),
a sub-fund of the UCITS La Française LUX (The “UCITS”)
The Fund is managed by La Française AM International,
part of La Française group of companies**

📍 OBJECTIVES AND INVESTMENT POLICY

The objective of the Fund is to achieve regular income and capital growth (total return) over the medium to long term.

The Fund intends to distribute income of at least 3% each year (rate defined at the beginning of each calendar year). These payments may reduce the Fund's capital.

The Fund invests mainly in equities, bonds and real estate securities from anywhere in the world, including emerging markets.

Specifically, the Fund invests up to 100% of net assets in equities and/or floating rate, fixed rate or inflation-indexed debt securities and negotiable debt instruments. The Fund may invest substantially in issuers that are rated at least BBB by Standard & Poor's or judged equivalent by the investment manager at the time of the purchase. Although the Fund has no minimum or maximum requirements as to sectors, countries or regions, at any given time it may have heavy exposure to specific types of investments.

The Fund may invest in, or be exposed to, the following investments up to the percentage of net assets indicated:

- equities: 100% (including exposure from convertible bonds up to 10%)
- real estate investment trusts (REITs) that qualify as transferable securities under the 2010 Law and related regulations, publically traded real estate preferred equities and debt securities, and equity-related securities of real estate operating companies: 40%

📍 RISK AND REWARD PROFILE

Risk and Reward Profile: The SRRI (Synthetic Risk and Reward Indicator) demonstrates where the Fund ranks in terms of its potential risk and return. The higher the Fund's position on this scale, the greater possible reward, but also the greater risk of losing money.

The risk category is 4 because of investments in various asset classes ie equities, fixed income ex-EM, emerging markets debt and REITs and other real estate related securities.

We bring your attention to the fact that:

- Historical data used in calculating the SRRI may not be a reliable indication of the future risk profile of the Fund.
- The risk indicator shown above is not guaranteed and it may shift over time.
- The lowest category does not mean a risk free investment.

Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

- convertible bonds: 30%
- contingent convertible bonds (coco bonds): 10%
- other UCITS/UCIs: 10%

The Fund may hold cash and cash equivalents on an ancillary basis. These may include monetary UCIs or UCIs whose investments' overall weighted maturity or rate reset frequency does not exceed 12 months.

Net exposure to non-EUR currencies may be up to 100% of net assets. The Fund's modified duration may vary from 0 to 15.

The investment manager uses a dynamic and flexible allocation process across selected asset classes.

The Fund may use derivatives as a substitute for direct investment, for hedging, for efficient portfolio management and to create leverage.

The Fund may also use credit default swaps and total return swaps based on emerging market government debt, corporate bonds and equities.

You can buy and sell shares of the Fund daily.

The income generated by the share Class I - EUR - DISTRIBUTION is distributed.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risks materially relevant to the Fund which are not adequately captured in the indicator:

Operational risk: the risk of loss for the Fund resulting from inadequate internal processes or system breakdowns, human errors or from external events.

Derivative risk: the Fund uses derivatives. These are financial instruments whose values depend on the value of the underlying asset. Small price fluctuations in the underlying asset can result in large price changes in the derivative.

Exchange rate risk: the Fund may invest in securities denominated in currencies other than the euro. Eurozone country investors are exposed to risks posed by fluctuations in currency exchange rates.

Convertible bonds risk: convertible bonds generally tend to be of lower credit quality and are likely to experience greater rises and falls in value. These securities may produce a higher level of income than investment grade bonds but at a higher risk to your capital.
