The objective of this Fund is to provide income and capital growth over the medium to longer term.

The Fund will seek to achieve the investment objective by actively allocating between global equities, global fixed income securities (including developed and emerging market government debt and corporate bonds), in equity securities of closed ended REITs (“REITs”), real estate operating companies, public real estate preferred equity or public real estate debt securities (together the “REITs and other real estate related securities”) and any other asset class that could contribute to maximize the Fund’s return.

The Fund’s strategy is based on a flexible and discretionary allocation between the following different asset classes: equities, fixed income ex-EM, emerging markets debt and REITs and other real estate related securities.

Financial derivatives may be used on a tactical basis, in order to achieve the investment objective. Such instruments may also be used for the purpose of hedging.

The overall exposure of the portfolio to equities including derivatives may represent 100% of the Fund’s net assets.

Risk and Reward Profile: The SRRI (Synthetic Risk and Reward Indicator) demonstrates where the Fund ranks in terms of its potential risk and return. The higher the Fund’s position on this scale, the greater possible reward, but also the greater risk of losing money.

The risk category is 4 because of investments in various asset classes ie equities, fixed income ex-EM, emerging markets debt and REITs and other real estate related securities.

We bring your attention to the fact that:

- Historical data used in calculating the SRRI may not be a reliable indication of the future risk profile of the Fund.
 - The risk indicator shown above is not guaranteed and it may shift over time.
- The lowest category does not mean a risk free investment.
