### Risk and return profile

The risk category mentioned above is based on historical data and is not representative of future categorization. As a result, this risk estimation may not be a reliable indicator of future risk and may be subject to change over time. The lowest category does not mean risk free investment. Resulting from its exposure to the Benchmark Index, the Fund has been classified within category 7. Category 7 indicates that under normal market conditions, it is possible to suffer a sudden, severe and even complete capital loss; the value of your investment may change substantially and have large daily upside or downside variation.

Material risks for the UCITS not covered by the above indicator, which could lead to a decrease in the net asset value of the Fund, and which the Fund is authorised to disclose in this document (for more details about risks, please refer to the Risk Profile section of the prospectus):

- **Counterparty risk:** The Fund is exposed to the risk of bankruptcy, or any other type of default of the counterparty related to any trading transaction entered into by the Fund. According to the UCITS regulations, this risk cannot exceed 10% of the total of the Fund's assets, for a given counterparty.
- **Risk of using FDI:** In order to reach its investment objective, the Fund enters into over-the-counter FDI which provide the performance of the Benchmark Index. The FDI could be affected by various risks such as change in law or tax events.
- **Fund Liquidity Risk:** The Fund's liquidity and/or value may be affected if, when rebalancing its exposure it is unable to execute trades in line with the index.
