Lyxor New Energy UCITS ETF - Dist (the "Fund")

ISIN: FR0010524777 - Compartment of the MULTI UNITS FRANCE investment company (the "Company") domiciled in France.

Managed by Lyxor International Asset Management S.A.S. ("LIAM")

Investment objectives and policies

The Fund's investment objective is to track both the upward and the downward evolution of the World Alternative Energy CW Net Total Return index (dividends reinvested) (the "Benchmark Index"), denominated in EUR and representative of securities deriving a significant portion of their income from the global alternative energy sector, including the top 20 securities in the renewable energy, energy efficiency, and power decentralisation sectors, while minimising as much as possible the tracking error between the performance of the Fund and that of its Benchmark Index.

The anticipated level of tracking error under normal market conditions is indicated in the Fund's prospectus.

The Solactive AG website (www.solactive.com) contains more detailed information about the Benchmark Index.

The Fund aims to achieve its objective through indirect replication, namely by entering into one or more over-the counter swap agreements (financial futures).

The Fund may invest in a diversified portfolio of international equities, the performance of which will be swapped against that of the Benchmark Index via financial futures. An up-to-date breakdown of the Fund's securities portfolio is provided on the website www.lyxoretf.com.

The net asset value is also indicated on the Reuters and Bloomberg pages of the Fund and may also be stated on the websites of stock markets where the Fund is listed.

The share currency is the Euro (EUR).

Risk and return profile

The risk and return category given above is based on the historical performance of the Fund's component assets or the performance of its benchmark index or the simulated performance of a portfolio model. As such, this risk estimation cannot be a reliable indicator of future risk, and it could change over time. The lowest category does not mean a risk-free investment. The Fund has been classified as category 6 given its exposure to the Benchmark Index. Category 6 indicates that it is possible to suffer a very large capital loss, under normal market conditions, as the value of your investment could fluctuate strongly and quite quickly both upward and downward each day.

The significant risks for the UCITS not taken into account in the above-mentioned indicator and which could result in a decrease in the Fund's net asset value and which the Fund is authorised to include in this document (see the Risk Profile section of the prospectus for more information concerning the risks):

- **Counterparty risk:** The Fund is exposed to insolvency risk or any other type of default of any counterparty with which it enters into an agreement or transaction, particularly in the case of OTC futures or temporary sales of securities. Such an event could result in a significant decrease in the Fund's net asset value. In accordance with the regulations applicable to the Fund, this risk may not exceed 10% of the Fund's total assets for a specific counterparty.
- **Risk associated with the use of derivative instruments:** The Fund may use financial contracts that entail various types of risks, including but not limited to leverage, high volatility, valuation, or liquidity risks.
