Lyxor MSCI World UCITS ETF - Monthly Hedged to EUR - Dist (the "Fund")

ISIN: FR0011660927 - Sub-fund of the MULTI UNITS FRANCE investment company (the "Company") domiciled in France.

Managed by Lyxor International Asset Management S.A.S. ("LIAM")

Investment objectives and policies

The Fund is a passively managed index-linked UCITS.

The investment objective of the Fund is to track both upward and downward movements in the MSCI World Net Total Return index (net dividends reinvested) (the "Benchmark Index"), denominated in US dollars (USD) and representative of large and mid-cap companies of all developed countries, while minimising the tracking error between the Fund's performance and the Benchmark Index's performance as much as possible.

The anticipated level of tracking error under normal market conditions is indicated in the Fund's prospectus.

Further information about MSCI indices can be found on the MSCI website (www.msci.com).

The Fund aims to achieve its objective via indirect replication, i.e. by entering into one or more over-the-counter swaps (financial derivative instruments, "FDIs"). The Fund may invest in a diversified portfolio of international equities, whose performance will be swapped for the performance of the Benchmark Index using FDIs.

The updated composition of the portfolio of securities held by the Fund is available at www.lyxoretf.com.

In order to hedge the euro (EUR) currency risk, the Fund uses a monthly hedging strategy to reduce the impact of currency risk against the currency of the Benchmark Index components.

The Fund's net asset value can also be found on the Fund's Reuters and Bloomberg pages and may be stated on the websites of the stock markets where the Fund is listed.

The share currency is the Euro (EUR).

Risk and return profile

The risk and return category given above is based on the historical performance of the Fund's component assets or the performance of its benchmark index or the simulated performance of a portfolio model. As such, this risk estimation cannot be a reliable indicator of future risk, and it could change over time. The lowest category does not mean a risk-free investment. The Fund has been classified as category 6 given its exposure to the Benchmark Index. Category 6 indicates that it is possible to suffer a very large capital loss, under normal market conditions, as the value of your investment could fluctuate strongly and quite quickly both upward and downward each day.

The significant risks for the UCITS not taken into account in the above-mentioned indicator and which could result in a decrease in the Fund's net asset value and which the Fund is authorised to include in this document (see the Risk Profile section of the prospectus for more information concerning the risks):

- **Counterparty risk:** The Fund is exposed to insolvency risk or any other type of default of any counterparty with which it enters into an agreement or transaction, particularly in the case of OTC futures or temporary sales of securities. Such an event could result in a significant decrease in the Fund's net asset value. In accordance with the regulations applicable to the Fund, this risk may not exceed 10% of the Fund's total assets for a specific counterparty.
- **Risk associated with the use of derivative instruments:** The Fund may use financial contracts that entail various types of risks, including but not limited to leverage, high volatility, valuation, or liquidity risks.
