LYXOR JPX-NIKKEI 400 UCITS ETF (DR) - C-EUR (the "Fund")

ISIN: FR0012144582 - A sub-fund of the investment company named MULTI UNITS FRANCE (the "Company") domiciled in FRANCE.

Managed by Lyxor International Asset Management ("LIAM")

Objectives and investment policy

The investment objective is to track both the upward and downward evolution of the l'Indice JPX-Nikkei 400 Net Total Return (Bloomberg code: JPNKNTR) ("Benchmark Index"), which is denominated in JPY and is representative of the performance of the equities of 400 companies listed on the Tokyo Stock Exchange, which are the most attractive for investors in terms of an effective use of their capital and whose management goals are focussed on the interest of the investors.

The anticipated ex-post tracking error under normal market conditions is 0.25%.

The Fund aims to achieve its objective through direct replication, namely by investing primarily in components of the Benchmark Index.

In order to maximise the replication of the Benchmark Index, the Fund may use a sampling technique, as well as transactions involving guaranteed temporary sales of securities. Any use of these techniques is detailed at www.lyxoretf.com. The updated composition of the Fund's securities portfolio can be found at www.lyxoretf.com.

The indicative net asset value is also shown on the Fund's Reuters and Bloomberg pages, and may also be referenced on the websites for markets where the Fund is listed.

Risk and return profile

The risk and return category provided below is based on the historical performance of the assets included in the fund or of its benchmark index. This risk indicator may, therefore, not be a reliable indicator of future risk, and it may change over time. The lowest category does not mean that the investment is risk-free. Resulting from its exposure to the Benchmark Index, the Fund has been classified within category 6. Category 6 indicates that it is possible to suffer a severe loss of capital under normal market conditions; the value of your investment may change substantially and experience quite large daily upside or downside variations.

Material risks for the Fund not covered by the above indicator, which could lead to a decrease in the net asset value of the Fund, and which the Fund is authorised to disclose in this document (for more details about risks, please refer to the Risk Profile section of the prospectus):
