This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LYXOR UCITS ETF SG GLOBAL VALUE BETA - C-USD (the "Fund")

ISIN: LU1081771369 - A sub-fund of the investment company named LYXOR INDEX FUND (the "Company") domiciled in Luxembourg. Managed by Lyxor International Asset Management ("LIAM")

Objectives and investment policy

The investment objective of the Fund is to track both the upward and the downward evolution of the "SG Global Value Beta Net Total Return Index" (Bloomberg Code: SGVBNT) ("Benchmark Index"), denominated in EUR and representative of the performance of a global basket of the 200 cheapest undervalued stocks listed on global developed markets, based upon fundamental relative sector valuation.

The anticipated level of the tracking error under normal market conditions is expected to be 0.08%.

The Fund seeks to achieve its objective via an indirect replication by entering into an over-the-counter swap contract (financial derivative instrument, the "FDI"). The Fund may also invest in a diversified portfolio of international equities, whose performance will be exchanged against the performance of the Benchmark Index via the FDI.

Updated composition of the Fund investment portfolio is available on www.lyxoretf.com. In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.

The share currency is the US Dollar (USD).

- **Invested financial instruments:** FDI, international equities, UCITS Funds, other financial instruments.
- **Dividend policy:** The Fund reinvests its income.
- **Net Asset Value:** is daily calculated providing that the relevant stock exchanges are open for trading and orders can be covered.
- **Redemption:** Investors are able to redeem their shares on the primary market every valuation day before 18:30 CET and sell their shares on the secondary market at any time during trading hours on the Fund listing places.

Risk and reward profile

The risk-return category shown above is based on the historical performance of the assets included in the fund, or of its benchmark index. This risk estimate may therefore not represent a reliable indicator of future risk, and may be subject to change over time. The lowest category does not mean risk free investment. Resulting from its exposure to the Benchmark Index, the Fund has been classified within category 6. Category 6 indicates that it is possible to suffer a severe loss of capital under normal market conditions ; the value of your investment may change substantially and have quite large daily upside or downside variation.

Main risks not covered by the above indicator which could lead to a decrease in the net asset value of the Fund and which the Fund is authorized to disclose in this document (for more details about risks, please refer to the Risk Profile section of the prospectus):

- **Counterparty risk:** The Fund is exposed to the risk of bankruptcy, or any other type of default of the counterparty related to any trading transaction entered into by the Fund.
- **Risk of using FDI:** In order to reach its investment objective, the Fund enters into over-the-counter FDI which provide the performance of the Benchmark Index. The FDI could be affected by various risks such as change in law or tax events.
