LYXOR UCITS ETF EURO STOXX 50 -Monthly Hedged C-USD

I. Fund Information

Ticker: MSEU LN

Investment Objective

The LYXOR UCITS ETF EURO STOXX 50 is a UCITS compliant exchange traded fund that aims to track as closely as possible the benchmark index EURO STOXX 50 Net Total Return Index by entering into a return swap contract. For this specific index, Lyxor provides through its swap based ETF the most efficient way of tracking the benchmark, with an expected lower tracking error, while the swap counterparty risk is targeted at 0% via a daily reset mechanism associated with a full property and control of all the assets held.

Lyxor ETFs are efficient investment vehicles listed on exchange that offer transparent, liquid and low-cost exposure to the underlying benchmark index.

Risk Factors

It is important for potential investors to evaluate the risks described below and in the fund prospectus which can be found on www.lyxoretf.com

CAPITAL AT RISK: ETFs are tracking instruments: Their risk profile is similar to a direct investment in the Underlying Index. Investors' capital is fully at risk and investors may not get back the amount originally invested.

REPLICATION RISK: The fund objectives might not be reached due to unexpected events on the underlying markets which will impact the index calculation and the efficient fund replication.

COUNTERPARTY RISK: Investors are exposed to risks resulting from the use of an OTC Swap with Societe Generale. In-line with UCITS guidelines, the exposure to Societe Generale cannot exceed 10% of the total fund assets.

UNDERLYING RISK: The Underlying Index of a Lyxor ETF may be complex and volatile. When investing in commodities, the Underlying Index is calculated with reference to commodity futures contracts exposing the investor to a liquidity risk linked to costs such as cost of carry and transportation. ETFs exposed to Emerging Markets carry a greater risk of potential loss than investment in Developed Markets as they are exposed to a wide range of unpredictable Emerging Market risks.

CURRENCY RISK: ETFs may be exposed to currency risk if the ETF is denominated in a currency different to that of the Underlying Index they are tracking. This means that exchange rate fluctuations could have a negative or positive effect on returns.

LIQUIDITY RISK: Liquidity is provided by registered market-makers on the respective stock exchange where the ETF is listed, including Societe Generale. On-exchange liquidity may be limited as a result of a suspension in the underlying market represented by the Underlying Index tracked by the ETF; a failure in the systems of one of the relevant stock exchanges, Societe Generale or other market-maker systems; or an abnormal trading situation or event.

It is each investor's responsibility to ascertain that it is authorised to subscribe, or invest into this product.

Prior to investing in the product, investors should seek independent financial, tax, accounting and legal advice.

LYXOR UCITS ETF EURO STOXX 50 is a *Fonds commun de placement* (French mutual fund), approved by the Autorité des marchés financiers (AMF) in accordance with provisions of the Directive 2009/65/EC (the "2009 Directive").

Société Générale et Lyxor International Asset Management (~ **Lyxor AM** »), recommend that investors read carefully the "risk factors" section of the product's prospectus and the "Risk and reward" section of the Key Investor Information Document (KIID). The prospectus in French and the KIID in French are available free of charge on www.lyxoretf.com or upon request to client-services@lyxor.com.

Units of a specific UCITS ETF managed by an asset manager and purchased on the secondary market cannot usually be sold directly back to the asset manager itself. Investors must buy and sell units on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units and may receive less than the current net asset value when selling them.

Updated composition of the product's investment portfolio is available on www.lyxoretf.com. In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the product, and might also be mentioned on the websites of the stock exchanges where the product is listed.

There is no guarantee that the fund's objective will be met. The fund may not always be able to replicate exactly the performance of the index (or indices).

This product includes a risk of capital loss. The redemption value of this product may be less than the amount initially invested. In a worst case scenario, investors could sustain the loss of their entire investment.
