Quarterly fund commentary

European equity markets ended the fourth quarter in negative territory. After sharp falls during October, driven by slightly softer macroeconomic data in Europe as well as China and the US, equity markets continued to struggle towards year end. The Italian budget negotiations as well as Brexit, trade tensions and weaker oil prices took a toll on markets. The earnings season in Europe also failed to inspire markets, as November witnessed more earnings misses than beats. The fund concentrates on stocks with attractive risk-return profiles as identified by a systematic investment process which is based on four factors: Earnings Momentum, Price Momentum, Quality and Value. This approach can lead to active positions relative to the benchmark. Looking at the performance attribution for the fourth quarter, the portfolio performance lagged the index. Earnings momentum factors detracted from performance. Stock specific effects as well as the fund's overweight in smaller sized companies also had a negative impact over the quarter. While implicit country positions had no major impact on active return implicit sector positions added to return. The fund's overweight in industrials was the main contributor on the sector level.

Indexed performance 7 October 2015 - 28 February 2019*

Each period starts at the end of the indicated month. The first indicated month may not represent a full month and may start only on the launch/restructuring date indicated in the headline.
