### Quarterly fund commentary

Developed market government bond yields rose during the quarter and spiked in November as President-elect Trump's policies were viewed as positive for the US economy. The ten year US treasury yield ended the quarter at 2.45%, 85 basis points (bps) higher than last quarter. Ten year UK gilts finished the quarter 51 bps higher at 1.25% while ten year Japanese treasury yields ended at 0.046% after spending most of the year in negative territory. Investment grade (IG) corporate bonds, US dollar emerging market (EM) bonds and structured products such as mortgage-backed securities (MBS) and collateralized MBS (CMBS) all posted losses driven by higher global interest rates due to a favorable economic outlook. High yield (HY) corporate bonds produced modest returns due to a rise in oil prices and the effect of global fiscal stimulus. The fund is positioned to deploy cash during bouts of volatility. We continue to focus on IG and HY bonds where we have high conviction. We have significantly increased our exposure to select EM issuers due to what we view as compelling valuations and tactical opportunities. Modest allocations of high quality structured products within MBS, CMBS, and asset backed securities such as collateralized loan obligations (CLOs) comprise the balance of the majority holdings within the fund.
