ISIN: LU1285960032 - A sub-fund of the investment company named Lyxor Index Fund (the "Company") domiciled in Luxembourg. Managed by Lyxor International Asset Management S.A.S. ("LIAM")

Objectives and investment policy

The investment objective is to track the upward and downward evolution of the "Markit iBoxx USD Liquid Investment Grade 150 Mid Price TCA Index" (net dividends reinvested) ("Benchmark Index") denominated in USD, representative of the performance of the 150 largest and most liquid investment grade corporate bonds issued in USD, while minimizing the volatility of the difference between the return of the Fund and the return of the Benchmark Index (tracking error).

The Fund is a passive fund.

The anticipated level of tracking error in normal market conditions is indicated in the prospectus.

Additional information about the Benchmark Index can be found at www.markit.com

LIAM informs investors that the Benchmark Index will change for the "Bloomberg Barclays MSCI USD Corporate Liquid SRI Sustainable Index" (the "**New Benchmark Index**"). The switch from the Benchmark Index to the New Benchmark Index will be implemented over a period of 21 Business Days starting July 29, 2019 and ending on August 26, 2019. During this period, performance of the Sub-Fund will differ from performance of the Benchmark Index.

The Fund seeks to achieve its objective via indirect replication by entering into an over-the-counter swap contract (financial derivative instrument, the "FDI"). The Fund may also invest in a diversified portfolio of international debt securities, whose performance will be exchanged against the performance of the benchmark Index via the FDI. Updated composition of the Fund holdings is available on www.lyxoretf.com.

In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.

The share currency is the Euro (EUR).

According to the regulation applicable to the Fund, such risk cannot exceed 10% of the Fund's total assets per counterparty.
- **Risk of Financial derivative Instruments:** The Fund invests in financial derivative instruments. These financial derivative instruments can induce different type of risks such as (but not limited to), leverage risk, high volatility risk, valuation risk or liquidity risk. If this risk occurs, the net asset value of the Fund may decrease significantly.
- **Credit risk:** The Fund is subject to the risk that any issuer could become insolvent or to otherwise event having an impact on the credit quality of this issuer. The consequence of this risk or event may result in a decrease of the net asset value of the Fund.
