## Quarterly fund commentary

Whilst heightened market volatility preceded the US election, its surprise outcome saw equity markets rally strongly over the quarter. President-elect Donald Trump's pro-growth, deregulation and reflationary views renewed investors' risk appetite and fuelled the rotation away from perceived 'defensive' sectors into more economically sensitive stocks. Banks, defence-related and infrastructure-related industries are expected to be the likely beneficiaries of such policies. Whereas the European Central Bank decided to extend quantitative easing until December 2017, growing confidence in the US economic outlook, a strong labour market and rising bond yields finally moved the US Federal Reserve to raise interest rates in December. Year-end saw oil producing countries jointly agree on output cuts to try to tackle global oversupply and boost oil prices. Overall, global equity markets ended the quarter in positive territory (total return, US dollar). The fund's strategy is to look for what we view as high quality companies at attractive valuations. We seek to invest in businesses that provide an attractive yield, a sustainable and growing level of income and capital upside potential. By quality, we refer to businesses that generate high and sustainable returns. We believe that these types of companies are more likely to be able to return cash to investors in the form of growing dividends.
