La Française Rendement Global 2025 - T D USD H units - FR0013288982

This mutual fund is managed by La Française Asset Management,
a company of the La Française Group

📌 OBJECTIVES AND INVESTMENT POLICY

The objective of the Fund, classified as "Bonds and other international debt instruments", is to outperform (net of fees) bonds issued by the French Government denominated in EUR maturing in 2025, over the recommended investment period of 8 years from the launch date of the Fund until 31/12/2025. The potential profitability of the Fund comes from the value of the accrued coupons of the bonds in the portfolio and the variations in capital due to the fluctuation in interest rates and credit spreads.

The annualised net performance objective is based on the accomplishment of market assumptions established by the management company. This is not a guarantee in terms of return or fund performance. The investor's attention is drawn to the fact that the performance outlined in the fund management objective takes into account the possibility of the risk of default or a downgrade of the rating of one or more issuers in the portfolio, the cost of currency hedging and management fees of the management company.

Benchmark index: The Fund has no benchmark index.

Range of sensitivity: between 8 and 0 (decreasing over time). The investment strategy involves the discretionary management of a portfolio of bonds maturing on or before 31/12/2025. The strategy is not limited to bond carrying; the Management Company may use arbitrage in the event of new market opportunities or an increased risk of default by one of the issuers in the portfolio.

Up to 100% of the Fund is invested in fixed or floating rate bonds and other negotiable debt instruments, in money market instruments and up to 30% in convertible bonds, issued by public and/or

private entities from OECD countries [0-100%]; non-OECD public entities (emerging markets) [0-100%]; non-OECD private entities (emerging markets) [0-50%], in all economic sectors. Securities are denominated in EUR and/or USD and/or GBP and/or NOK and/or CHF. The exchange risk for securities not denominated in EUR is systematically hedged. The issues (or, failing that, the issuers) are Investment Grade (rating better than or equal to BBB- (Standard&Poor's) or Baa3 (Moody's) or equivalent according to the Management Company's analysis) and/or High Yield issues (of a speculative nature) (rating less than BBB- or Baa3 or equivalent according to the Management Company's analysis) or without rating (within a limit of 20% maximum of the net assets). The Management Company will not rely

📌 RISK/RETURN PROFILE

Textual explanations of the risk indicator and its main limitations:

The level 3 risk indicator reflects investments in products denominated in EUR and/or USD and/or GBP and/or NOK and/or CHF, of Investment Grade or speculative rating in OECD or non-OECD countries, issued by public and/or private sector entities.

This information is based on past results in terms of volatility.

Historical data, such as that used to calculate the synthetic risk indicator, may not be a reliable indication for the future risk profile of the UCI.

The risk category associated with this UCI is not guaranteed and may change over time.

The lowest category does not mean "risk free".

Key Investor Information

This document provides essential information for investors in this mutual fund. It is not a promotional document. It contains information provided in accordance with a statutory requirement to help you understand what investing in this mutual fund involves and what risks are associated with it. You are advised to read this document in order to make an informed decision on whether or not to invest.

exclusively or systematically on ratings, but rather will conduct a credit analysis at the time of investment.

During the period starting from the first subscription date and up until the minimum amount of the assets under management reaches 7 (seven) million euros, the Fund will be invested in money market securities.

The Fund may carry out transactions for the temporary purchase and sale of securities.

Financial futures, traded on regulated or over-the-counter markets, are used to hedge and/or expose the portfolio to interest rate and/or credit futures markets, and with the aim of solely hedging on future exchange markets: futures, forwards, options, interest rate swaps, foreign exchange swaps, forward exchange transactions, Credit Default Swaps (CDS on single underlying asset options, CDS on index), Non Deliverable Forwards.

The Fund may carry out Total Return Swaps (TRS).

Given the management implemented, the Fund's risk profile will vary over time; exposure to different risk factors will decrease as the investment strategy approaches its maturity. As the Fund approaches maturity and depending on the prevailing market conditions, the Management Company will opt either to continue the investment strategy, merge with another UCITS or liquidate the fund, subject to the AMF's approval.

Recommended investment period: until 31 December 2025. Subscribers are informed that their primary interest is to maintain their investment until 31 December 2025 in order to benefit from the best actuarial yield conditions offered by the Fund

Redemption methods: Redemptions are centralised at 11.00 a.m. every day (D) by La Française AM Finance Services and carried out on the basis of the next net asset value, with settlement on D+2 (trading days).

Subscription to the Fund will close on 31 March 2020 at 11.00 a.m. From this date, only subscriptions preceded by a redemption on the same day for the same number of units, for the same net asset value and by the same unitholder may be executed.

Allocation of distributable amounts: Income: Capitalisation and/or distribution; added-value: capitalisation and/or carry forward and/or distribution, with the possibility of distributing payments.

This UCI does not benefit from a capital guarantee.

Significant risks to the mutual fund not included in this indicator:

Risk associated with the impact of techniques such as derivative products:

The risk of increased losses owing to the use of financial futures instruments such as OTC financial agreements and/or futures contracts.

Credit risk:

The risk arising from an issuer's downgrade or default. This risk is even greater should the Fund invest in speculative securities which could lead to the net asset value of the Fund decreasing and a loss of capital.

Counterparty risk:

The risk that a counterparty may default on payment. Thus, the default of a counterparty may lead to a decline in the net asset value.
