This marketing document is exclusively for use by Qualified Investors in Switzerland and Professional Clients in Continental European countries as defined in the important information section. This document is not for consumer use, please do not redistribute.

Summary of fund objective

The Fund seeks to achieve an absolute return above 3-month EURIBOR over a market cycle with a low correlation to traditional financial market indices. The Fund seeks to achieve its objective through a combination of (i) a market neutral micro-economic strategy of taking long and short positions in global equities ("micro strategy") and (ii) a global macro-economic strategy of taking long and short positions in global stocks, bonds, foreign exchange and commodities ("macro strategy"). For the full objectives and investment policy please consult the current prospectus.

Quarterly fund commentary

Global equity markets ended the year near all-time highs amid solid corporate earnings and accelerating economic activity. Global economic growth continued to be robust and broad-based, driven by industrial activity and investment. In the US, returns were boosted by President Trump's end-of-year tax-cutting package and promised infrastructure spending. Economic growth indicators in the euro-area remained strong and picked up additional momentum over the quarter. The economic uptick continued to be broad-based, driven by a booming manufacturing sector as well as a robust services sector. Accelerating growth in the euro-area has yet to translate into higher prices, justifying the European Central Bank's decision in October to prolong its asset purchase program for nine months. Japan's equity market benefitted from the large victory of the ruling coalition in the snap election and ended the quarter with solid gains. The Market Neutral strategy performed negatively as our multi-factor stock selection model detracted value. The Financial Futures strategy delivered flat returns over the quarter. Coming into the first quarter 2018, the fund continues to hold long positions in equities and short positions in bonds.

Risk Warnings

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date. The fund will invest in derivatives (complex instruments) which will result in the fund being leveraged and may result in large fluctuations in the value of the fund. Investment in instruments providing exposure to commodities is generally considered to be high risk which may result in large fluctuations in the value of the fund.
