Quarterly fund commentary

Global equity markets ended the year near all-time highs amid solid corporate earnings and synchronised global economic growth. US Federal Reserve (Fed) chair Janet Yellen told the Joint Economic Committee: "The economic expansion is increasingly broad based across (US) sectors as well as across much of the global economy." Equity market performance in December helped global equity markets achieve their best annual performance since the post financial crisis recovery. The Fed increased interest rates in December, as was widely anticipated. Though it was President Trump's end-of-year tax-cutting package and promised infrastructure spending which boosted equity market returns globally and not just in the US. The performance of the UK and European equity markets was largely driven by the oil & gas as well as the mining sectors. They had benefited from a sharp improvement in copper prices, buoyed by demand in China and strengthening global economic growth. The fund is entirely driven by high conviction, unconstrained stock selection. We seek what we believe to be the best investment ideas from across the world, building an occasionally concentrated portfolio of stocks that we believe has the potential to deliver attractive returns over the long term. As we have increased the fund's exposure in 2016 towards more economically sensitive sectors, we decided to reduce exposure to the few stocks we own with high balance sheet leverage as a way of mitigating portfolio risk.
