Quarterly fund commentary

Asian equity markets rallied thanks to positive earnings growth revisions and solid global economic expansion. In China, upbeat 3Q results led to higher earnings expectations in the internet and industrial sectors. Elsewhere, Indian equities were supported by the ruling Bharatiya Janata Party's victories in state elections and the planned recapitalisation of the state-owned banks. In Korea, the market was helped by an agreement with China, which normalised relations post the installation of the US anti-missile system, and strong 3Q GDP growth estimates. Taiwan ended the quarter higher but parts of the market exposed to Apple's supply chain suffered due to lukewarm demand for iPhone X and iPhone 8. We seek to invest in companies whose share prices are substantially below our estimate of fair value. The fund has a high weighting in a selection of highly cash generative Chinese internet companies, as we believe the market is too sceptical on their ability to maintain strong earnings growth. However, we took profits in recent outperformers, and we added new positions in a Chinese online retailer with strong cashflow generation and high barriers to entry and a Chinese telecommunication services company which is out of favour due to the lull in telecom capex before the introduction of 5G. We have a notable position in South Korea where we believe companies are likely to adopt shareholder friendly policies.
