

LA FRANÇAISE

Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

La Française LUX - Global Credit Duration Hedged - Class I EUR - Capitalisation-LU1787040796

A share class of La Française LUX - Global Credit Duration Hedged (the “Fund”),
a sub-fund of the UCITS La Française LUX (The “UCITS”)
The Fund is managed by La Française AM International,
part of La Française group of companies

OBJECTIVES AND INVESTMENT POLICY

The objective of the Fund is to outperform (net of fees) the reference benchmark by at least 1%, over any given 3-year period.

Reference index: 3-month Euribor Index

The Fund invests mainly in investment grade corporate bonds in any currency from issuers in OECD countries, including those considered emerging markets. Specifically, the Fund invests in fixed rate and floating rate negotiable debt instruments, certificates of deposit and money market instruments issued or guaranteed by an OECD member state. The Fund invests mainly in securities that are rated at least BBB by Standard & Poor's or judged equivalent by the investment manager at the time of the purchase.

The Fund may invest in, or be exposed to, the following investments up to the percentage of net assets indicated:

- below investment grade or unrated securities: 10%
- contingent convertible bonds (coco bonds): 10%
- equities: 10%

The Fund may hold cash and cash equivalents on an ancillary basis. These may include monetary UCIs or UCIs whose investments' overall weighted maturity or rate reset frequency does not exceed 12 months.

Non-USD investments are hedged to USD.

The investment manager uses qualitative and quantitative criteria for country allocation, as well as credit analysis to select securities that offer a superior combination of yield and creditworthiness. The investment manager also seeks to reduce or eliminate interest rate risk through duration hedging.

The Fund may use derivatives as a substitute for direct investment, for hedging and for efficient portfolio management.

The Fund may also use credit default swaps (including those based on indices). You can buy and sell shares of the Fund daily

All income generated by share Class I EUR of the Fund is reinvested and included in the value of its shares.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 3 years

RISK AND REWARD PROFILE

Risk and Reward Profile: The SRRRI (Synthetic Risk and Reward Indicator) demonstrates where the Fund ranks in terms of its potential risk and return. The higher the Fund's position on this scale, the greater possible reward, but also the greater risk of losing money.

We bring your attention to the fact that:

- Historical data used in calculating the SRRRI may not be a reliable indication of the future risk profile of the Fund.
- The risk indicator shown above is not guaranteed and it may shift over time. The lowest category does not mean a risk free investment.

Risks materially relevant to the Fund which are not adequately captured in the indicator:

Credit risk: the Fund can invest in debt securities. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer.

Counterparty risk: the Fund enters into contracts with various counterparties. If a counterparty does not fulfil its obligations to the Fund (e.g. not paying an

agreed amount or not delivering securities as agreed) the Fund can suffer a loss.

Interest rate risk: an increase in interest rates may cause the value of fixed income securities held by the Fund to decline. Bonds prices and yield have an inverse relationship, when the price of a bond falls the yield rises.

Emerging markets risk: emerging markets are more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

Derivative risk: the Fund uses derivatives. These are financial instruments whose values depend on the value of the underlying asset. Small price fluctuations in the underlying asset can result in large price changes in the derivative.

Contingent Convertible (“Coco”) Bond Risk: investment in this particular type of bond may result in material losses to the Fund based on certain trigger events. The existence of these trigger events creates a different type of risk from traditional bonds and may more likely result in a partial or total loss of value or alternatively they may be converted into shares of the issuing company which may also have suffered a loss in value. Such trigger events may include a reduction in the issuers' capital ratio, determination by a regulator or the injection of capital by a national authority. Investors should be aware that in the event of a financial crisis that action by regulators or the companies themselves may cause concentrations of these trigger events across the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST	
Entry charge	3.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and/or before the proceeds of your investment are paid out. The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

CHARGES TAKEN FROM THE FUND OVER A YEAR	
Ongoing charges	0.78%

The ongoing charges figure shown here is an estimate of the charges. The UCITS' annual report for each financial year will include detail on the exact charges made.

CHARGES TAKEN FROM THE FUND UNDER CERTAIN SPECIFIC CONDITIONS	
Performance fee	-

The performance fee shall represent a maximum of 20% of the difference between the performance of the Fund and the performance of the 3-month Euribor Index. The Fund pays the performance fee on an annual basis.

For more information about charges, please refer to the UCITS' prospectus, which is available at the registered office of the UCITS.

PAST PERFORMANCE

until 29/06/2018: Based on the performance as from the launch date until the absorption date of the Fund "LFP S&P CAPITAL IQ FUND - LFP R2P GLOBAL CREDIT" managed by La Française AM International and absorbed by the Fund "La Française LUX – Global Credit Duration Hedged" on 29/06/2018.

This Share class came into existence during the year 2018.

There is therefore insufficient data to provide a useful indication of past performance.

The Fund came into existence during the year 2018.

The past performance of this share class has been calculated in EUR, taking into account all charges and costs except for entry charges.

Past performance is not a reliable indicator of future results.
