MANAGEMENT PHILOSOPHY

Dorval Manageurs Euro invests at least 75% of the portfolio in equities, with at least 60% of the total portfolio in the euro area. The fund is eligible for French PEA equity savings plans. Our portfolio managers draw on their in-depth knowledge of each company's management team and managerial profile to select stocks, while also focusing on securities that offer the strongest growth prospects within a defined risk framework. The portfolio management team can invest up to 25% of assets in money market instruments and debt securities, depending on its macro-economic analysis.

The fund seeks to outperform the MSCI EMU Net Total Return Euro over a 5-year investment timeframe. The portfolio is focused on around 40 securities from across the full range of market capitalisations, with an emphasis on stocks that are undervalued on the basis of the growth-at-a-reasonable-price (GARP) model.

RISK AND REWARD PROFILE

The risk-return scale (profile) is an indicator with a score from 1 to 7. It corresponds to an increasing level of risk and return. It is the result of a regulatory methodology based on annualised volatility, calculated over 5 years. Checked on a periodic basis, the indicator can vary.

MONTHLY COMMENTARY

After a first half dominated by risk aversion, the European markets managed to end June on the highest point of the year, after investors were reassured both by a resilient world economy in May-June and an easing in the US-China trade war following the G20 summit in Osaka.

Against this backdrop, Dorval Manageurs Euro staged showings in line with its reference indicator –jumping 16.1% vs. 16.4% for the MSCI EMU NR (EUR). The fund was lifted over the first half of the year by strong showings from Worldline, Neste, Deutz and the takeover bid on Altran. We wound down our TUI holding in June ahead of the summer season, which is vital for profitability but is unfortunately set to be hard hit by pricing pressure, just like 2018.

LEGAL INFORMATION

All data relating to the fund are obtained from the book inventory and data relating to the indices and the characteristics of securities held in the portfolio are obtained from Bloomberg. The figures indicated relate to previous years. Past performance is not a reliable indicator of future performance. Investors are reminded that the composition of the portfolio may differ considerably from that of its benchmark index. As the management style is discretionary, the portfolio will never seek to reproduce the composition of the benchmark index either on a geographical or sector level. The benchmark index is therefore simply an a posteriori performance indicator. The risks and costs relating to investment in UCITS are described in the relevant prospectus. The prospectus and periodic reports are available on request from Dorval Asset Management. The prospectus must be provided to investors prior to subscription. The definition of risk indicators mentioned in this document may be found on the website: www.dorval-am.com. Prior to any investment, it should be verified that the investor is legally authorised to invest in a UCITS. The UCITS is not authorised for distribution in jurisdictions other than the countries in which it is registered. Performance data does not take into account fees and commissions received in respect of the issue and redemption of units or tax costs imposed by the client's country of residence. If a UCITS is subject to a specific tax regime, it should be noted that this regime depends on the individual situation of each client and may be liable to change. This document is intended for professional and non-professional clients. It may not be used for any purpose other than that for which it was designed and may not be reproduced, distributed or transmitted to third parties, either in whole or in part, without the prior written authorisation of Dorval Asset Management. The information contained in this document may not be deemed to have any contractual value whatsoever. Dorval Asset Management may not be held responsible for any decision taken on the basis of information contained in this document. Dorval Asset Management, société anonyme (public limited company) with share capital of EUR 303,025 registered in the Paris trade and companies register under number B 391 392 768 - APE 6630 Z, AMF approval no. GP 93-08

Definitions

Alpha:	A fund's outperformance compared with its benchmark, expressed as a percentage. This is an indicator of the manager's ability to create value, by excluding the market effect. Therefore, the higher the alpha, the better the fund's performance compared with that of its benchmark.
Beta:	Measure of a fund's sensitivity to market movements (represented by its benchmark). A beta higher than 1 indicates that the fund amplifies the trends of its reference market on the upside as well as on the downside. Conversely, a beta lower than 1 means that the fund tends to react less to movements in its reference market.
Sharpe ratio:	Indicator of a product's outperformance relative to a risk-free interest rate, given the risk taken (the product's volatility). The higher it is, the better the fund.
Volatility:	Magnitude of the variation of a security, a fund, a market or of an index over a given period. A high volatility means that the price of the security varies significantly, and therefore that the security's associated risk is high.
Maximum performance:	Maximum gain historically recorded by the fund.
Maximum drawdown:	Maximum loss historically recorded by the fund.
Recovery period:	Time expressed in number of days the fund takes to exceed the highest net asset value over the indicated period.
Gain frequency:	Calculation over the fund's history since its creation representing the ratio of the number of positive observations to the total number of observation in the period.
Exposure as a percentage:	The fund's overall exposure takes into account the sum of the physical and off-balance sheet positions. As opposed to positions called of net assets: "physical"(those booked in the portfolio's inventory of assets), off-balance sheet positions include those taken in forward financial instruments, such as derivatives. Examples of derivatives: futures contracts, swaps, option contracts. A maximum limit to off-balance sheet exposure is stated in the prospectus.

Glossary for Managers

In their qualitative analysis of corporate management, the managers classify business leaders in four major categories:

Empire builders : They are real niche creators and able to identify one or more long-term growth opportunities.

Family Heirs : They have a family tie to the builder and assume operational management of the company. They often start with a poor image...which is not always justified. They are often supported in their ventures by an experienced manager.

Homegrown managers : They learned their trade at the company they are now managing. In most cases, they have over 10 years of experience in a management position with the company in an international context.

Rescuers : They have a specific ability to restore the earnings growth of a company. They are put in charge during a crisis or for "reasons of state". These leaders manage various companies in a turnaround situation.

Morningstar methodology

© 2018 Morningstar, Inc. All rights reserved.

The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; (3) is not warranted to be accurate, complete or timely.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

Past performance is no guarantee of future results. References to rankings, awards and/or ratings are not an indicator of future performance by the fund or the fund manager.

The Morningstar rating applies to funds with a history of at least three years. It takes into account subscription fees, the risk-free return and the fund's volatility in order to calculate the MRAR (Morningstar Risk Adjust Return) ratio for each fund. The funds are then ranked by decreasing order of MRAR: the first 10% receive 5 stars, the next 22.5% 4 stars, the next 35% 3 stars, the next 22.5% 2 stars, and the last 10% receive 1 star. The funds are ranked within 180 European categories.
