

# KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Lyxor Green Bond ESG Screened (DR) UCITS ETF - Acc (the "Fund")

ISIN: LU1981859819 - A sub-fund of the investment company named MULTI UNITS LUXEMBOURG (the "Company") domiciled in Luxembourg. Managed by Lyxor International Asset Management S.A.S. ("LIAM")

## Objectives and investment policy

The investment objective of the Fund is to track both the upward and the downward evolution of the "Solactive ESG Green Bond EUR USD IG" (the "Benchmark Index"), denominated in EUR, in order to offer an exposure to the Green Bonds market issued by entities screened according to Environmental, Social and Governance (ESG) criteria, while minimizing the volatility of the difference between the return of the Fund and the return of the Benchmark Index (the "Tracking Error").

The anticipated level of tracking error in normal market conditions is indicated in the prospectus.

The Index is representative of the performance of Green Bonds issued by investment grade entities screened according to ESG criteria denominated in Euros and US Dollars. Green bonds are issued in order to fund projects that have positive environmental outcomes.

Additional information about the Benchmark Index can be found at [www.solactive.com](http://www.solactive.com).

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.

The Fund seeks to achieve its objective via a direct replication, by investing primarily in the securities comprising the Benchmark Index.

To optimize the Benchmark Index replication, the Fund may use a sampling replication strategy. The potential use of these techniques is published on Lyxor's website: [www.lyxoretf.com](http://www.lyxoretf.com). Updated composition of the Fund holdings is available on [www.lyxoretf.com](http://www.lyxoretf.com).

In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.

The share currency is the Euro (EUR).

- **Invested financial instruments:** International bonds
- **Dividend policy:** the Fund's amounts available for distribution (if any) shall not be distributed to Shareholders, but reinvested.
- **Net Asset Value:** is daily calculated providing that the relevant stock exchanges are open for trading and orders can be covered.
- **Redemptions:** investors are able to redeem their shares on the primary market every valuation day before 18:30 Europe/Luxembourg and sell their shares on the secondary market at any time during trading hours on the Fund listing places.

## Risk and reward profile

The risk-return category shown above is based on the historical performance of the assets included in the Fund or the performance of its benchmark index or the computed performance of a portfolio model. This risk estimate may therefore not represent a reliable indicator of future risk, and may be subject to change over time. The lowest category does not mean risk free investment. Resulting from its exposure to the Benchmark Index, the Fund has been classified within category 3. Category 3 indicates that under normal market conditions a small capital loss is possible ; the value of your investment may have slight and very low daily upside or downside variations.

Main risks not covered by the above indicator which could lead to a decrease in the net asset value of the Fund and which the Fund is authorized to disclose in this document (for more details about risks, please refer to the Risk Profile section of the prospectus): not applicable.

- **Credit risk:** The Fund is subject to the risk that any issuer could become insolvent or to otherwise event having an impact on the credit quality of this issuer. The consequence of this risk or event may result in a decrease of the net asset value of the Fund.
- **Operational risk:** In the event of an operational failure of the management company or one of its representatives, investors could experience loss, delay in processing subscriptions, conversions, redemptions orders or other type of disruptions.
- **Liquidity risk:** In certain circumstances, for example in case of low trading volume on financial markets, any buy or sale trade on financial instruments held by the Fund or having an impact on its value may lead to important variations of their valuations. In such circumstances, the net asset value of the Fund could be negatively affected.
