MANAGEMENT PHILOSOPHY

Dorval Manageurs Small Cap Euro is an equity fund that invests primarily in euro area small- and mid-caps, and is eligible for French equity savings plans (PEA) and SME equity savings plans (SME PEA). It also carries the French government Reliance and SRI accreditations. The fund takes an active investment approach with no restrictions as it seeks to lock in leading euro area companies' growth, assessed on the basis of Dorval Asset Management's selection criteria. This approach is governed by a stringent socially responsible investment policy, as fundamental analysis of eligible companies is combined with screening for environmental, social and governance (ESG) opportunities and risks. The management objective is to outperform the MSCI EMU Small Cap Net Total Return over a minimum recommended five-year investment timeframe.

FUND MANAGER'S COMMENT

Indices continued to gain in April, while the first quarter earnings reporting season is going off smoothly with several companies reporting figures that outstrip expectations. Vetoquinol reported a 24% jump in revenues, including 12% organic growth, compared with an already robust 1Q 2020 due to inventories. The valuation (EV/sales 2.5x, EV/EBITDA 13.2x) is still far short of multiples seen in the latest sector transactions. Séché Environnement posted growth of 3.6% including 8% in France, while international operations remain hampered by the situation in Latin America: growth over the year is expected to come out at around 10% on continued attractive valuations of 5.5x EV/EBITDA. We added German company Elmos to the portfolio before its earnings report: the company specializes in semi-conductors and sensors for the automotive industry and its growth is expected to come to 30% for 2021, while valuation multiples are among the lowest in the sector. We also increased our holdings in Sword (17% organic growth in 1Q), which will pay out an exceptional dividend in May, and Aures (higher recurring operating profit 2020), which should be lifted by the economic upturn in the US and UK, although we will monitor the situation on electronic components.

RISK AND REWARD PROFILE

The SRRI level of this UCITS is an indicator with a score from 1 to 7. It corresponds to an increasing level of risk and reward. It is the result of a regulatory methodology based on annualised volatility, calculated over 5 years. Checked on a periodic basis, the indicator can vary.

References to rankings, labels, awards or ratings are not an indicator of the future performance of the fund or the investment manager.

NET PERFORMANCE SINCE INCEPTION

Active share

Active share measures the difference in breakdown of an equity portfolio as compared to its benchmark.

Past performance is not a reliable indicator of future performance. Performance calculation takes into account net dividend re-invested for the fund and net dividend re-invested for the reference indicator.

Fund risks

Equity investments may undergo major share price fluctuations. The fund is exposed to certain specific risks, i.e. **risk of capital loss**, equity risk, risk related to market capitalization size, exchange rate risk, risk related to the use of derivatives products, interest rate risk, credit risk. Capital invested is not guaranteed. Please refer to the fund's full prospectus for a full description of risks.

ESG PERFORMANCE REPORT

Monthly report as at 30 April 2021

This fund carries an SRI accreditation

SRI APPROACH AND METHODOLOGY

Dorval Asset Management takes a long-term investment approach, and we firmly believe that we have a pivotal role to play in directing investment to build a more responsible and sustainable economy. We engage with real economy stakeholders to encourage them to adapt their environmental, social and governance practices to support this transition, acting as a responsible investor as we pledge to meet the highest standards with both our clients and partners, as well as with the companies we invest in.

Dorval Asset Management's approach since 2004 has consistently been built on shareholder dialogue, drawing on a practical and collaborative approach in our role as shareholder – further reinforced by our voting policy – as well as in our regular meetings with companies. This governance approach is resolutely grounded in the Manageurs range's philosophy, which includes the original Dorval Manageurs fund.

However, we also look beyond this aspect and include all Environmental, Social and Governance considerations in our extra-financial analysis for securities in our initial investment universe and our assessment of managers.

For more information on our methodologies, please refer to our Dorval AM website: https://www.dorval-am.com/en_FR/our-esg-approach

Coverage: Calculated as a percentage of assets excluding cash investments

PROPRIETARY RATING METHODOLOGY

Our proprietary ESG methodology draws on input from our partner MSCI as well as in-house research information to develop issuer ratings across each fund's investment universe.

Our approach is based on the following principles:

- * We assess ESG challenges and allocate an in-house weighting after screening for sector-specific, geographical and market cap considerations;
- * We assign an ESG rating for each issuer based on its exposure to the challenges set out, and the way they are managed by the company.

Our portfolio management teams and our financial and extra-financial analysts screen for 37 ESG challenges based on a range of qualitative and quantitative indicators, with a particular focus on 12 of these aspects.

The extra-financial score - from 0 to 10, with 10 being the top score - is based on each of the E, S and G dimensions. We exclude 20% of the investment universe comprising companies with the lowest scores and with an eliminatory score on at least one of the dimensions. Issuers with a governance rating of less than 1,5 are excluded. Any issuer with an overall extra-financial rating of less than 2 is also excluded.

Our methodology draws partly on primary data from an external provider. Our approach places governance at the very center of our ESG analysis and can therefore minimize certain environmental or social risks and opportunities.

RATING FOR FUNDS' FIVE LARGEST HOLDINGS

Coverage: Calculated as a percentage of total weighting for companies

DEFINITIONS

Monthly report as at 30 April 2021

Active share: Active share measures the difference in breakdown of an equity portfolio as compared to its benchmark.

Alpha: Coefficient used to measure a fund's additional positive or negative performance as compared to levels its market risk – as measured by its reference indicator – would justify. We calculate: $\text{Alpha} = \text{Fund average (MoyenneFonds)} - (\text{Reference indicator average (MoyenneIndice)} * \text{Beta})$.

Beta: Measure of a fund's sensitivity to market movements (represented by its reference indicator). A beta higher than 1 indicates that the fund amplifies the trends of its reference market on the upside as well as on the downside. Conversely, a beta lower than 1 means that the fund tends to react less to movements in its reference market. We calculate: $\text{Beta} = \text{Fund-reference indicator covariance (CovarianceFondsIndice)} / \text{Reference indicator variance (VarianceIndice)}$;

- Fund-reference indicator covariance (CovarianceFondsIndice): covariance for weekly fund and reference indicator performances
- Reference indicator variance (VarianceIndice): variance in the reference indicator's weekly performances
- Fund average (MoyenneFonds), Reference indicator average (MoyenneIndice): average of weekly performances for fund and reference indicator.

Dividend yield: Returns are the yield on shares, equating to the dividends paid by companies that the fund invests in, divided by these companies' share price.

DNR: Net dividends reinvested

EV/EBIT: Enterprise value divided by operating profit. This multiple is useful in assessing the speed at which an investor will recover the initial investment in a company after a full takeover.

Gain frequency: Ratio of the number of positive observations to the total number of observations since fund inception.

Growth in earnings per share: Trends in profits for companies in the fund's holdings, weighted for the proportion of these shares held in the fund.

Information ratio: The information ratio measures the fund's relative performance adjusted for each point of volatility compared to its reference indicator. We calculate: $\text{Information ratio (RatioInfo)} = \text{Average difference (MoyenneDiff)} / \text{Average standard deviation (StdDevDiff)}$;

- Average difference (MoyenneDiff): The average of the performance differences between the fund and the reference indicator
- Average standard deviation (MoyenneStdDev): The standard deviation of performance differences between the fund and the reference indicator.

Maximum performance: Maximum gain historically recorded by the fund.

Maximum drawdown: Maximum loss historically recorded by the fund.

P/E multiple: The price/earnings multiple is calculated by dividing the share price by its net earnings per share. The P/E is used to value a share as compared to share prices for sector peers: the lower the P/E, the cheaper the share price is deemed to be.

Recovery period: Time expressed in number of days the fund takes to exceed the highest net asset value over the indicated period.

Risks: Risk data are calculated over a given timeframe based on weekly performances.

Sharpe ratio: Indicator of a fund's outperformance relative to a risk-free rate, divided by the risk taken (fund volatility). The Sharpe ratio measures the marginal performance per unit of risk. The higher the ratio, the higher the fund's risk-adjusted yield. We calculate: $\text{Information ratio (RatioInfo)} = (\text{Annualised fund performance (PerfsFondsAnnualise)} - \text{Risk-free rate (TauxSansRisque)}) / (\text{Fund standard deviation (FondsStdDev)} * \text{Sqrt (52)})$;

- Annualised fund performance (PerfFondsAnnualise): the fund's annualised performance over the investment period
- Risk-free rate (TauxSansRisque): the annualised EONIA performance over the investment period
- Fund standard deviation (FondsStdDev): The fund's performance standard deviation.

Tracking error: Tracking error is the standard deviation for the series of differences between portfolio returns and benchmark returns. High tracking error implies a major difference between the fund and the benchmark, whether on the upside or downside.

Volatility: Amplitude in the variation of a financial instrument over a given time period. High volatility means that the share price varies significantly and therefore that the risk associated with the share is high.

MANAGERS GLOSSARY

The fund management team ranks the company managers in 4 broad categories:

Homegrown Managers: these executives started their career in the company they manage today. In most cases, they have more than 10 years' experience in the company in a management position in an international context;

Rescuers: they were given authority during a crisis. These managers are the heads of a pool of companies in turnaround situations;

Empire Builders: genuine niche developers, they have the ability to identify one or more long-term growth opportunities;

Family Heirs: they have a family link with the Builder and take on the operational management of the company. They often start out with a poor image which is not always justified. They are often supported in their ventures by an experienced manager.

DEFINITIONS OF SRI STRATEGIES (ESG REPORTING)

Best-in-Universe: The best-in-universe approach focuses on companies carrying the highest non-financial scores, independently of their business sector. Sectors that are broadly deemed to be most virtuous will be more heavily represented, so this approach can lead to sector bias, which we fully recognize.

Engagement: Our engagement strategy comprises both individual shareholder engagement – exercising our voting rights, conducting direct and constructive dialogue with companies as part of a relationship established over the long term – and collaborative shareholder engagement via various influential financial market bodies: these policies are rolled out to encourage companies and/or policymakers to take on board non-financial criteria.

Exclusion: Our exclusion strategy covers both sector exclusion – ruling out sectors deemed to be harmful to society – and exclusion based on compliance with standards, whereby we exclude companies that do not comply with the United Nations Global Compact and companies subject to controversies that we feel are incompatible with our values.

Integration: Environmental, social and governance criteria (ESG) are directly integrated or embedded in the fund management process via an ESG score developed for each stock in the investment universe. The ESG score is used both to ascertain the eligible investment universe and as a building block for the portfolio construction and management process.

SRI Label: Created by the French Ministry of Finance, this public label aims at giving Sustainable Responsible Investment (SRI) management an extra visibility with savers. To obtain the SRI Label, the certification body conducts an audit to ensure the funds meet a set of labelling criteria. For further information on the methodology, visit www.lalabelsri.fr. References to rankings, labels, awards or ratings are not an indicator of the future performance of the fund or the investment manager.

MORNINGSTAR METHODOLOGY © 2021 Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. References to rankings, awards and/or ratings are not an indicator of future performance by the fund or the fund manager. The Morningstar rating applies to funds with a history of at least three years. It takes into account subscription fees, the risk-free return and the fund's volatility in order to calculate the MRAR (Morningstar Risk Adjust Return) ratio for each fund. The funds are then ranked by decreasing order of MRAR: the first 10% receive 5 stars, the next 22.5% 4 stars, the next 35% 3 stars, the next 22.5% 2 stars, and the last 10% receive 1 star. The funds are ranked within 180 European categories.

LEGAL NOTICES - DISCLAIMER AND PRODUCT RISKS

Any products, services or investments referred to herein are rendered exclusively outside of Colombia. This material does not constitute a public offering in Colombia and is addressed to less than 100 specifically identified investors. **In Mexico:** Provided by Natixis IM Mexico, S. de R.L. de C.V., which is not a regulated financial entity, securities intermediary, or an investment manager in terms of the Mexican Securities Market Law (Ley del Mercado de Valores) and is not registered with the Comisión Nacional Bancaria y de Valores (CNBV) or any other Mexican authority. Any products, services or investments referred to herein that require authorization or license are rendered exclusively outside of Mexico. While shares of certain ETFs may be listed in the Sistema Internacional de Cotizaciones (SIC), such listing does not represent a public offering of securities in Mexico, and therefore the accuracy of this information has not been confirmed by the CNBV. Natixis Investment Managers is an entity organized under the laws of France and is not authorized by or registered with the CNBV or any other Mexican authority. Any reference contained herein to "Investment Managers" is made to Natixis Investment Managers and/or any of its investment management subsidiaries, which are also not authorized by or registered with the CNBV or any other Mexican authority. **In Uruguay:** Provided by Natixis Investment Managers Uruguay S.A., a duly registered investment advisor, authorised and supervised by the Central Bank of Uruguay. Office: San Lucar 1491, oficina 102B, Montevideo, Uruguay, CP 11500. The sale or offer of any units of a fund qualifies as a private placement pursuant to section 2 of Uruguayan law 18,627.
