MANAGEMENT PHILOSOPHY

Dorval Manageurs Europe carries the French government SRI accreditation and is eligible for French equity savings plans (PEA): it is designed to lock in leading European companies' growth assessed on the basis of Dorval Asset Management's selection criteria. The fund takes an active investment management approach – with no restrictions – that is governed by a stringent socially responsible investment policy, as it combines fundamental analysis of eligible companies with screening for environmental, social and governance (ESG) opportunities and risks. The portfolio management team focuses on stocks that associate growth prospects with a reasonable price in their stock-picking approach. Our teams conduct further analysis on the director, management team and governance bodies on the basis of qualitative and quantitative criteria, drawing on the principle that performances are driven by a successful manager-company tandem. The fund's management objective is to outperform the MSCI PAN EURO Net Return over a minimum recommended five-year investment timeframe. The Fund does not seek to replicate this reference indicator and can therefore significantly diverge from it.

FUND MANAGER'S COMMENT

After a very upbeat year on the European stock-markets in 2021, profit-taking picked up the pace in February due initially to the jump in long-term interest rates against a backdrop of recurring inflationary pressure, and in the second half of the month as a result of Russia's invasion of Ukraine. Against this backdrop, the fund underperformed its reference indicator, which has a broadly defensive make-up (MSCI Pan Euro NR: -2.94%) due to the plunge for financials since the start of the war. Société Générale exited the portfolio on its Russian market exposure, as did most of our Atos position, following a speculative surge in the share price. In the telecoms sector: 1/ we sold Ericsson as soon as a significant corporate governance controversy was announced, and 2/ we added Orange to the portfolio pending an accretive merger of its mobile towers and a savings program that could materialize following the arrival of the new CEO. Lastly, we added to our holding in Vinci on expectations of a gradual recovery in air traffic this year and a more generous shareholder payout policy.

RISK AND REWARD PROFILE

Lower risk, typically lower rewards ← Higher risk, typically higher rewards →

The SRRI level of this UCITS is an indicator with a score from 1 to 7. It corresponds to an increasing level of risk and reward. It is the result of a regulatory methodology based on annualised volatility, calculated over 5 years. Checked on a periodic basis, the indicator can vary.

References to rankings, labels, awards or ratings are not an indicator of the future performance of the fund or the investment manager.

NET PERFORMANCE SINCE INCEPTION

Active share

Active share measures the difference in breakdown of an equity portfolio as compared to its benchmark.

Past performance is not a reliable indicator of future performance. Performance calculation takes into account net dividends re-invested for the fund and net dividends re-invested for the reference indicator since 1st January 2013.

Fund risks

Equity investments may undergo major share price fluctuations. The fund is exposed to certain specific risks, i.e. **risk of capital loss**, equity risk, exchange rate risk, interest rate risk, credit risk, risk associated with the use of derivatives, sustainability risk. Capital invested is not guaranteed. You may recover less than you invested. Please refer to the fund's full prospectus for a full description of risks.

ESG PERFORMANCE REPORT

Monthly report as at **28 February 2022**

SRI APPROACH AND METHODOLOGY

Dorval Asset Management takes a long-term investment approach, and we firmly believe that we have a pivotal role to play in directing investment to build a more responsible and sustainable economy. We engage with real economy stakeholders to encourage them to adapt their environmental, social and governance practices to support this transition, acting as a responsible investor as we pledge to meet the highest standards with both our clients and partners, as well as with the companies we invest in.

Dorval Asset Management's approach since 2004 has consistently been built on shareholder dialogue, drawing on a practical and collaborative approach in our role as shareholder – further reinforced by our voting policy – as well as in our regular meetings with companies. This governance approach is resolutely grounded in the Manageurs range's philosophy, which includes the original Dorval Manageurs fund.

However, we also look beyond this aspect and include all Environmental, Social and Governance considerations in our extra-financial analysis for securities in our initial investment universe and our assessment of managers.

For more information on our methodologies, please refer to our Dorval AM website: https://www.dorval-am.com/en_FR/our-esg-approach

PROPRIETARY RATING METHODOLOGY

Our proprietary ESG methodology draws on input from our partner MSCI as well as in-house research information to develop issuer ratings across each fund's investment universe.

Our approach is based on the following principles:

- * We assess ESG challenges and allocate an in-house weighting after screening for sector-specific, geographical and market cap considerations;
- * We assign an ESG rating for each issuer based on its exposure to the challenges set out, and the way they are managed by the company.

Our portfolio management teams and our financial and extra-financial analysts screen for 37 ESG challenges based on a range of qualitative and quantitative indicators, with a particular focus on 12 of these aspects.

The extra-financial score - from 0 to 100, with 100 being the top score - is based on each of the E, S and G dimensions. We exclude 20% of the investment universe comprising companies with the lowest scores and with an eliminatory score on at least one of the dimensions. Issuers with an environmental or social rating of less than 10 or a governance score of under 30 are excluded. Any issuer with an overall extra-financial rating of less than 40 is also excluded.

Our methodology draws partly on primary data from an external provider. Our approach places governance at the very center of our ESG analysis and can therefore minimize certain environmental or social risks and opportunities.

RATING FOR FUNDS' FIVE LARGEST HOLDINGS

| | ESG | E | S | G | Weight |

PORTFOLIO'S CONTRIBUTION TO SUSTAINABLE DEVELOPMENT GOALS

The Sustainable Development Goals (SDG) offer a blueprint to achieve a better and more sustainable future for all. They address the global challenges we face, including poverty, inequality, climate change, environmental degradation, prosperity, peace and justice.

The SDGs are interconnected and it is crucial to achieve both all these goals and their targets out to 2030 to ensure that no-one is left behind.

SUSTAINABLE DEVELOPMENT GOALS

FIVE MAIN CONTRIBUTIONS TO SDGs (AS % OF FUND)

The total for the SDGs may exceed 100%, as all stocks can contribute to one or several goals. Our calculations draw on MSCI data and are based on companies' alignment with the 17 SDGs, weighted for the proportion each company represents in our fund.

DEFINITIONS

Monthly report as at **28 February 2022**

Active share: Active share measures the difference in breakdown of an equity portfolio as compared to its benchmark.

Alpha: Coefficient used to measure a fund's additional positive or negative performance as compared to levels its market risk – as measured by its reference indicator – would justify. We calculate: $\text{Alpha} = \text{Fund average (MoyenneFonds)} - (\text{Reference indicator average (MoyenneIndice)} * \text{Beta})$.

Beta: Measure of a fund's sensitivity to market movements (represented by its reference indicator). A beta higher than 1 indicates that the fund amplifies the trends of its reference market on the upside as well as on the downside. Conversely, a beta lower than 1 means that the fund tends to react less to movements in its reference market. We calculate: $\text{Beta} = \frac{\text{Fund-reference indicator covariance (CovarianceFondsIndice)}}{\text{Reference indicator variance (VarianceIndice)}}$

- Fund-reference indicator covariance (CovarianceFondsIndice): covariance for weekly fund and reference indicator performances
- Reference indicator variance (VarianceIndice): variance in the reference indicator's weekly performances
- Fund average (MoyenneFonds), Reference indicator average (MoyenneIndice): average of weekly performances for fund and reference indicator.

Dividend yield: Returns are the yield on shares, equating to the dividends paid by companies that the fund invests in, divided by these companies' share price.

DNR: Net dividends reinvested

The €STR (European Short Term Rate) is a new money market benchmark, calculated and published by its administrator, the European Central Bank (ECB), which has been gradually replacing another short-term rate, the EONIA, since 2 October 2019. The €STR is the market benchmark interbank interest rate in the eurozone. It is calculated every day using data collected from several European banks. Further information on the benchmark index is available on its administrator's website: www.ecb.europa.eu.

EV/EBIT: Enterprise value divided by operating profit. This multiple is useful in assessing the speed at which an investor will recover the initial investment in a company after a full takeover.

Gain frequency: Ratio of the number of positive observations to the total number of observations since fund inception.

Growth in earnings per share: Trends in profits for companies in the fund's holdings, weighted for the proportion of these shares held in the fund.

Information ratio: The information ratio measures the fund's relative performance adjusted for each point of volatility compared to its reference indicator. We calculate: $\text{Information ratio (RatioInfo)} = \frac{\text{Average difference (MoyenneDiff)}}{\text{Average standard deviation (StdDevDiff)}}$

- Average difference (MoyenneDiff): The average of the performance differences between the fund and the reference indicator
- Average standard deviation (MoyenneStdDev): The standard deviation of performance differences between the fund and the reference indicator.

Maximum performance: Maximum gain historically recorded by the fund.

Maximum drawdown: Maximum loss historically recorded by the fund.

P/E multiple: The price/earnings multiple is calculated by dividing the share price by its net earnings per share. The P/E is used to value a share as compared to share prices for sector peers: the lower the P/E, the cheaper the share price is deemed to be.

Recovery period: Time expressed in number of days the fund takes to exceed the highest net asset value over the indicated period.

Risks: Risk data are calculated over a given timeframe based on weekly performances.

Sharpe ratio: Indicator of a fund's outperformance relative to a risk-free rate, divided by the risk taken (fund volatility). The Sharpe ratio measures the marginal performance per unit of risk. The higher the ratio, the higher the fund's risk-adjusted yield. We calculate: $\text{Sharpe ratio (RatioInfo)} = \frac{\text{Annualised fund performance (PerfsFondsAnnualise)} - \text{Risk-free rate (TauxSansRisque)}}{\text{Fund standard deviation (FondsStdDev)} * \sqrt{52}}$

- Annualised fund performance (PerfFondsAnnualise): the fund's annualised performance over the investment period
- Risk-free rate (TauxSansRisque): the annualised €ESTER performance over the investment period
- Fund standard deviation (FondsStdDev): The fund's performance standard deviation.

Tracking error: Tracking error is the standard deviation for the series of differences between portfolio returns and benchmark returns. High tracking error implies a major difference between the fund and the benchmark, whether on the upside or downside.

Volatility: Amplitude in the variation of a financial instrument over a given time period. High volatility means that the share price varies significantly and therefore that the risk associated with the share is high.

MANAGERS GLOSSARY

The fund management team ranks the company managers in 4 broad categories:

Homegrown Managers: these executives started their career in the company they manage today. In most cases, they have more than 10 years' experience in the company in a management position in an international context;

Rescuers: they were given authority during a crisis. These managers are the heads of a pool of companies in turnaround situations;

Empire Builders: genuine niche developers, they have the ability to identify one or more long-term growth opportunities;

Family Heirs: they have a family link with the Builder and take on the operational management of the company. They often start out with a poor image which is not always justified. They are often supported in their ventures by an experienced manager.

DEFINITIONS OF SRI STRATEGIES (ESG REPORTING)

Best-in-Universe: The best-in-universe approach focuses on companies carrying the highest non-financial scores, independently of their business sector. Sectors that are broadly deemed to be most virtuous will be more heavily represented, so this approach can lead to sector bias, which we fully recognize.

Engagement: Our engagement strategy comprises both individual shareholder engagement – exercising our voting rights, conducting direct and constructive dialogue with companies as part of a relationship established over the long term – and collaborative shareholder engagement via various influential financial market bodies: these policies are rolled out to encourage companies and/or policymakers to take on board non-financial criteria.

Exclusion: Our exclusion strategy covers both sector exclusion – ruling out sectors deemed to be harmful to society – and exclusion based on compliance with standards, whereby we exclude companies that do not comply with the United Nations Global Compact and companies subject to controversies that we feel are incompatible with our values.

Integration: Environmental, social and governance criteria (ESG) are directly integrated or embedded in the fund management process via an ESG score developed for each stock in the investment universe. The ESG score is used both to ascertain the eligible investment universe and as a building block for the portfolio construction and management process.

SRI Label: Created by the French Ministry of Finance, this public label aims at giving Sustainable Responsible Investment (SRI) management an extra visibility with savers. To obtain the SRI Label, the certification body conducts an audit to ensure the funds meet a set of labelling criteria. For further information on the methodology, visit www.lalabelisr.fr. References to rankings, labels, awards or ratings are not an indicator of the future performance of the fund or the investment manager.

OUTPERFORMANCE FEE: The Management Company ensures that over a performance period of 5 years maximum, any underperformance of the UCITS compared to the benchmark index is compensated before performance fees become due.

MORNINGSTAR METHODOLOGY © 2022 Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. References to rankings, awards and/or ratings are not an indicator of future performance by the fund or the fund manager. The Morningstar rating applies to funds with a history of at least three years. It takes into account subscription fees, the risk-free return and the fund's volatility in order to calculate the MRAR (Morningstar Risk Adjust Return) ratio each month for each fund. The funds are then ranked by decreasing order of MRAR: the first 10% receive 5 stars, the next 22.5% 4 stars, the next 35% 3 stars, the next 22.5% 2 stars, and the last 10% receive 1 star. The funds are ranked within 180 European categories.
