

Lyxor Portfolio Strategy Defensive UCITS ETF - I-EUR

1. FUND INFORMATION

Ticker: F702 GY

Investment objective

The Lyxor Portfolio Strategy Defensive UCITS ETF fund-of-funds combines the advantages of competitively priced, passively managed ETFs with the broad diversification of fund-of-funds. The fund invests in three asset classes: equity, fixed income and commodities. The aim of this multi-asset strategy is to achieve a long-term growth by a broad diversification of asset classes, geographic regions, sectors and currencies. As the Lyxor Portfolio Strategy Defensive UCITS ETF invests in a number of ETFs which are already diversified, the fund-of-funds achieves an even higher diversification of its investment. 50% of the portfolio is invested into bonds and money market instruments, such as sovereign bonds, covered bonds and EONIA deposits. The equity exposure stands at 40% and includes both developed and emerging markets. The commodity exposure amounts to 10% and is represented by investments into Gold ETCs such as Xetra-Gold®. The weight of 50%/40%/10% is rebalanced once a year to its original allocation. Moreover, an extraordinary rebalancing takes place if the equity quota deviates from the initial asset allocation by more than five percentage points.

Important information for Investors

Parties entering into transactions (such as a derivative or financing transaction) or investing in financial instruments that use an index or a variable interest rate (benchmark) are exposed to the risk that:

(1) such benchmark may be subject to methodological or other changes which could affect the value of the relevant transaction; or
(2) (i) may become not compliant with applicable laws and regulations (such as the European Benchmark Regulation), (ii) may cease to be published (possible cessation of LIBOR publication or planned cessation of EONIA both after December 2021), or (iii) the supervisor or administrator of any such benchmark may make a statement that the relevant benchmark is no longer representative, and as a consequence the relevant benchmark may be replaced by another benchmark which may have an adverse and material impact on the economics of the relevant transactions.

You should conduct your own independent investigation and analysis of the potential consequences of any relevant risks such as those mentioned above, particularly in light of the ongoing industry initiatives related to the development of alternative reference rates and the update of the relevant market standard documentation.

Risk Factors

It is important for potential investors to evaluate the risks described below and in the fund prospectus which can be found on www.lyxoretf.com

CAPITAL AT RISK: ETFs are tracking instruments: Their risk profile is similar to a direct investment in the Underlying Index. Investors' capital is fully at risk and investors may not get back the amount originally invested.

REPLICATION RISK: The fund objectives might not be reached due to unexpected events on the underlying markets which will impact the index calculation and the efficient fund replication.

UNDERLYING RISK: The Underlying Index of a Lyxor ETF may be complex and volatile. When investing in commodities, the Underlying Index is calculated with reference to commodity futures contracts exposing the investor to a liquidity risk linked to costs such as cost of carry and transportation. ETFs exposed to Emerging Markets carry a greater risk of potential loss than investment in Developed Markets as they are exposed to a wide range of unpredictable Emerging Market risks.

CURRENCY RISK: ETFs may be exposed to currency risk if the ETF is denominated in a currency different to that of the Underlying Index they are tracking. This means that exchange rate fluctuations could have a negative or positive effect on returns.

LIQUIDITY RISK: Liquidity is provided by registered market-makers on the respective stock exchange where the ETF is listed, including Societe Generale. On-exchange liquidity may be limited as a result of a suspension in the underlying market represented by the Underlying Index tracked by the ETF; a failure in the systems of one of the relevant stock exchanges, Societe Generale or other market-maker systems; or an abnormal trading situation or event.

Investor's Notice

**The Total Expense Ratio (TER) covers all costs incurred by the Management Company to manage the underlying assets. It comprises a Management Fee and Structural Costs described as follows. The Management Fee represents the compensation for the Management Company services. The Structural Costs represent the custodian fee, the administrative fee, the audit fee and all other operating costs that will be paid by the Management Company to operate the funds.

This document was prepared by Lyxor Asset Management. This document, and the information contained therein, does not constitute an issue prospectus according to articles 652a and 1156 of the Swiss Code of Obligations ("CO") or a listing prospectus according to the Listing Rules of the SIX Swiss Exchange. The information in this document is illustrative and provided for informational purposes only.

Some of the information contained herein has been taken from sources which Societe Generale and LYXOR FUNDS SOLUTIONS S.A. believe to be reliable, but does not guarantee as such. This document does not constitute an offer or an invitation to invest or purchase any financial instrument. Societe Generale, Lyxor AM and Lyxor Asset Management Luxembourg assume no fiduciary responsibility or liability for any consequences financial or otherwise arising from the subscription or acquisition of any instrument described in this document.

The investor should make its own appraisal of the risks and should consult to the extent necessary its own legal, financial, tax, accounting and other professional advisors in this respect prior to any subscription or acquisition. This document can not be copied, reproduced or distributed, entirely or partly, without Societe Generale, Lyxor AM and Lyxor Asset Management Luxembourg agreement.
