

ComStage 1 EURO STOXX 50[®] UCITS ETF

The ComStage 1 EURO STOXX 50[®] UCITS ETF is an exchange-traded investment fund (Exchange Traded Fund, "ETF") linked to the performance of the EURO STOXX 50[®] Index (Price-Index). ComStage ETFs combine the advantages of a traditional investment fund and the tradability of a stock. The EU Fund Directive "UCITS" stipulates that all fund inventory are segregated assets ("Sondervermögen"). Should an investment company file for insolvency, ETF assets are not affected because they are held in an account separated from the asset manager's balance sheet. The Net Asset Value (NAV) of an ETF is calculated daily by the custodian bank independently. ComStage ETFs are traded continuously on several stock exchanges just like equities. Other than actively managed funds, ETFs do not charge entry and exit fees when traded via stock exchanges. Instead transaction costs apply as with standard equity trades. ETFs can also be traded overthe-counter (OTC) through market makers.
